#### FHI 059, Version 13

#### Additional Case Information:

Lumpfish imported from Ireland (Bantry Marine Research Station) - One input this year in February.

Salmon came onto site from Barcaldine in two inputs over 2 days in December 2019.

Fish are transported live haul to South Shian processing plant for harvesting.

Average female leps rose above the CoGP threshold for treatment in weeks 39 and 40 (4.77 and 1.06 respetively). Hydrolicer was brought onto site in wk39 and numbers reduced the following week, with numbers below the threshold for treatment by wk 41.

Mortalities across the site were above 1% in wk38 and wk39, attributed to environmental insult in combination with gill health issues. These were reported. Mortalities reduced the following week and have remained below 1% since.

The site operates with a risk-based seasonal approach to gill health, taking gill swabs every week from 10 fish per cage.

Thermolicer treatment carried out in w/b 12/10.

One motality observed across the site. Fish were sitting deep in the water so difficult to observe, but when observed on the camera, appeared healthy and exhibited good shoaling behaviour and feeding response.

Fish sampled for VMD appeared healthy.

Sea Lice Inspection (Seawater Sites Only)		
1. Has the site experienced sea lice problems in	the previous 4 years?	Ν
2. Is the CoGP Farm Management Area (or equi		year class basis?
3. Does the site have access to a range of licent azamethiphos and emamectin benzoate) as we	ced in-feed and bath sea lice medications (in- ell as access to suitable biological and/or med	cluding deltamethrin, Y
4. Is there a signed documented farm managem Management Area (or equivalent)?	ient agreement or statement relevant to the s	site and CoGP Farm
5. Are sea lice count records available for inspec	ction? (Legal SSI, CoGP Annex 6)	Y
6. Do records adequately reflect the required sta	andard specified in the SSI and the CoGP? (L	Legal SSI, CoGP Annex 6) Y
7. Are sea lice ( <i>L. salmonis</i> ) record levels below records are inspected? (CoGP Annex 6)	the suggested criteria for treatment in the C	COGP during the period that N
8. Have average adult female sea lice (L. salmo	nis) numbers per fish been at a level of 3 or	above (prior to w/b 10/6/19) or Y
If yes, have these been reported to the Fish Hea	alth Inspectorate? If no, FHI see comment.	Y
9. Is C. elongatus infestation at a level which is	considered to cause significant welfare probl	lems? (CoGP 4.3.81, 5.3.50) N
10. Have therapeutic treatments been administer suggested criteria for treatment or where <i>C. elon</i>		
11. Has any other action been taken (where app	blicable)?	N/A
12. Have therapeutic treatments or the actions ta	aken had a significant impact upon the lice le	evels recorded? Y
13. Are treatments, where conducted, carried out	It in cooperation between participating farms?	? Y
14. Is there a harvesting strategy for the site, wh	ere fewer populations or part populations are	e held without treatment for Y
15. Is there a site specific written lice manageme	ent procedure with waypoints describing set a	actions to deal with recognised Y
16. Do the sea lice levels observed on stocks re	flect sea lice count data? If no please detail r	reasons. Y
Containment Inspection		
1. Has the site experienced equipment damage	due to predators in the current or previous pr	roduction cycles? N
2. Are measures in place to mitigate against the		
Sapphire seal pro nets, ADD available for d	eployment but currently not in use.	
If other, detail below:		
3. Have escape incidents or events been exper	ienced on or in the vicinity of the site since th	ne last FHI inspection? N
If Yes proceed with questions 4 – 9. If No skip to	o question 10	
4. Have these been reported to Scottish Minister	rs?	
5. Have these been reported to local DSFB forth	with (where they exist)? (CoGP - 4.4.37, 5.4	4.17)
6. Have these been reported to the SSPO and lo	ocal fisheries trusts forthwith (where they exis	st)? (CoGP – 4.4.37, 5.4.17)
7. Were methods (if any) used to recover escap	ees? If yes give detail	
8. If gill nets were deployed was this action agre Ministers? (Legal, CoGP – 4.4.38, 5.4.18)	ed with local wild fish interests and was perm	nission given by Scottish
9. What action was taken to prevent and minimized	se the risk of further escapes? (Not covered i	in code but could
be considered under satisfactory measures	s of the Act)	
10. Is the site inspected as satisfactory with rega	ards to containment? If no, please detail reas	son(s) Y

### FISH HEALTH INSPECTORATE VISIT REPORT

#### SUMMARY FOR INFORMATION OF SITE OPERATOR

BUSINESS NO FB0125 SITE NO FS0875 INSPECTOR DATE OF VISIT20/10/2020SITE NAMEWalters (East Lismore)CASE NO20200425

#### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009, and to meet the requirements of European Community Council Directive 2006/88/EC.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

## Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

#### Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Date: 26/10/2020

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at <a href="https://www.gov.scot/publications/fish-health-inspectorate-service-charter/">https://www.gov.scot/publications/fish-health-inspectorate-service-charter/</a>
