UNI/REG only - if unable to carry out intended visit detail reason below:						

#### Additional Case Information:

During ECI inspection of Quoys Hatchery, inspector noticed that the ova coming onto the site were from Coutts Mill. This site was made inactive November 2016. An unannounced inspection of Coutts Mill was then carried out. Seems to be a lack of communication within the company led to this. Relevant paperwork was submitted to FHI post inspection and site was reactivated 19/11/2020. Enforcement Notice is being prepared to issue to the operator.

At last inspection the company stated that they had no plans on using the site again so it was made inactive. But brood fish from Turness (FS0451) were brought onto the site October 2019 and subsequently stripped through November to December 2019 then culled. The site was then fallow from 7 December 2019 until 1 October 2020 when more brood fish have been brought onto site from Bay of Cleat (South) FS0595 and are due to be stripped November. Company are planning to repeat this process for 2021.

3 raceways currently holding 719 brood fish. No lethargic or moribund fish visible on site.

2019 Generation Morts.

6 (0.7%) morts for whole generation on site (849) from 3rd October to 7th December

Staff at site also operating at Quoys Hatchery but separate PPE being used at each site along with equipment.

Inspection of mortality records etc completed remotely on 30th October by

## FISH HEALTH INSPECTORATE VISIT REPORT

#### SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS NO
 FB0095
 DATE OF VISIT 19/10/2020

 SITE NO
 FS0388
 SITE NAME
 Coutts Mill

 INSPECTOR
 CASE NO
 20200452

### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, without prior notification, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009, and to meet the requirements of European Community Council Directive 2006/88/EC.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as low. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every third year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

The following point was raised with the site representative during the inspection:

The status of the site was changed to inactive in 2016 and it was removed from the list of sites Cooke Aquaculture Scotland Ltd were authorised to operate at. An application to amend the authorisation and to re-activate the site prior to the reintroduction of fish in 2019 was not submitted. An application to amend the authorisation issued under the Aquatic Animal Health (Scotland) Regulations 2009 must be completed and submitted to the Fish Health Inspectorate immediately.

## Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007 with respect to section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory.

Please contact myself or the duty inspector should you require any assistance or clarification in implementing any requirement or recommendation detailed in this report.

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at <a href="https://www.gov.scot/publications/fish-health-inspectorate-service-charter/">https://www.gov.scot/publications/fish-health-inspectorate-service-charter/</a>

## Case completion report

Recommendations in relation to the above case were made for immediate implementation. Following submission of the required documentation, evidence has now been provided to Marine Scotland to demonstrate that the recommendations have been implemented.

This case will now be closed. This site may be subject to further audit and recommendations in the future.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
