Diagnostic samples taken? N

UNI/REG only - if unable to carry out intended visit detail reason below:

**Additional Case Information:**

Site inspection on Sunday. Some (~2-3 per cage) dead fish observed floating in some cages. A low prevalence of fish with visible fungus-like growth observed in all pens. Between 5-10 fish per pen but these were actively swimming. Visibility was limited, the water was peaty which usually means fungus-like growth is easier to see.

Confirmed with the site manager that the pens will be skimmed of any slow moving fish near the surface prior to loading with any fish with visible fungus-like growth being removed.

7 pens inspected for export. Disinfection certificate for lorry submitted electronically 30/10/2020. Certificate INTRA.GB.2020.0026005-V1 (MD20/098) issued on 01/11/2020.
