#### **Additional Case Information:**

Paperwork completed remotely on 20/04/2021 by \_\_\_\_\_, shadowed by Physical site inspection on 27/04/2021 by \_\_\_\_\_

Lice: 2021 wk15 1.27AF and 2021 wk16 1.31AF planning treatment within two weeks. Possibly salmosan treatment or mechanical treatment.

Are working on agreeing a Farm Management Agreement but this is not yet in place. Farm management statement inspected.

WRS left over from last cycle, with risk assessment. New input of lumpfish for current stock. Risk assessment for SAL movement from Port na Cro to Kingairloch inspected. Movement required due to biomass.

Some smaller slower moving fish observed in some cages, a few fish with lesions/damage observed deeper in the water column in a few pens, however these were swimming actively and were out of reach. Two lethargic fish were removed and dispatched. One had a damaged eye but was otherwise a large health fish, the other one appeared to be a poor dooer with darker coloration. The fish was opened up but no gross pathology was observed so no samples were collected. From the last pen 6 dead lumpfish and a few SAL mortalities were removed. This pen had been attempted to do a swim through the previous day but the net had gotten tangles with a rope, which is thought to have been the cause of the mortality. Fish sampled for VMD appeared healthy.

 CASE No
 20210058

DATE OF VISIT 27/04/2021 SITE NAME Kingairloch INSPECTOR

#### Case completion report

Recommendations in relation to the above case were made for implementation by 07 June 2021. Following submission of the required documentation, evidence has now been provided to Marine Scotland to demonstrate that the recommendations have been implemented.

This case will now be closed. This site may be subject to further audit and recommendations in the future.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

# FISH HEALTH INSPECTORATE VISIT REPORT

## SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS No
 FB0119

 SITE NO
 FS0241

 CASE NO
 20210058

DATE OF VISIT 27/04/2021 SITE NAME Kingairloch INSPECTOR

### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

# Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

#### Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to fish farm management agreements and statements and containment and escapes.

On this occasion recommendations were issued in relation to:

• A harvesting strategy for the site, where fewer populations or part populations are held without treatment, with regards to sea lice was not available.

Please ensure that this point has been addressed by 07 June 2021. Records or documentation demonstrating that this point has been addressed should be sent to the Fish Health Inspectorate (contact details below). The site may be subject to further inspection or enforcement action should the appropriate action regarding the above point not be taken within the time period stipulated.

Please contact myself or the duty inspector should you require any assistance or clarification in implementing any requirement or recommendation detailed in this report.

Signed:

Date: 07/05/2021
