Additional Case Information:

Stock on site have been vaccinated against PD with Ajmicro 1 and 6.

Haemorrhagic smolt syndrome (HSS) and nephrocalcinosis are present on site. HSS has been the most significant cause of mortalities, however is not causing large mortalities within the population on site.

Ensiled waste is collected by Fergusons and taken to Scanbio in Inverness.

Fish came onto site from Inchmore (FS0226).

Site has begun moving fish off to sea sites. ~112k fish will be moved to Colonsay (FS1296), the remaining stock will go to Seaforth (FS1042).

Site is prophylactically treating against fungus every 2 days using Formalin and Cress (Bronopol).

A few moribund fish observed across the site (~4) displaying fungal lesions.
