FHI 059, Version 13	ls	sued by: FHI	Date of issue: 12/05/2020
Case No: 2021-0173			Date of visit: 09/06/2021
Time spent on site:	4 hours	Main Inspe	ector:
Site No: FS1233 Business No: FB0169	Site Name: Business Name:	Eughlam The Scottish Salmon Comp	pany
Case Types: 1 ECI	2 CNI 3 SLI	4 VMD 5	6
Water Temp (°C): 11.3	Thermometer No:	T148	FHI 045 completed
Observations:	Region: WI	Water type: S	CoGP MA: W-1
Dead/weak/abnormally behavin Clinical signs of disease observ Gross pathology observed? Diagnostic samples taken? UNI/REG only - if unable to carr	ved?	N If yes, see additional ir N If yes, see additional ir N	formation/clinical score sheet. formation/clinical score sheet. formation/clinical score sheet.

#### Additional Case Information:

Fish on site from West Strome (2020 S0), Loch Huamavat, Geocrab Hatchery and Clachan Hatchery (2020 S1). Delivery from Clachan Hatchery was delayed and higher mortalities post transfer in pen 3 due to fungus. No issues with other inputs. Site will stock with mix of lumpfish and wrasse at later date.

Fish have had Slice treatments in March and May. Only used Salmosan once during last cycle during transfer of some fish to another sea site. Hydrolicer treatments have been improved with clearance rates above 90% and less physical damage of fish. New hydrolicer due to arrive with company later in the year which can process 300T per hour.

Site reported tuna and seal in pen 7 on 11 October 2020 and reported to FHI (MSe111020SAL1). Hole believed to have been caused by tuna and seal entered pen through the hole which was repaired. No fish escaped.

The 2020 S0 stock is due to be thinned soon and will be transferred to Vacasay in the autumn to make room for grading of S1 stock.

Water dark and fish low, but no moribund fish observed. All fish sampled for VMD appeared healthy. Remote inspection conducted on 2/6/21

## FISH HEALTH INSPECTORATE VISIT REPORT

### SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS No
 FB0169

 SITE No
 FS1233

 CASE No
 20210173

DATE OF VISIT09/06/2021SITE NAMEEughlamINSPECTORInspector

#### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

# Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

#### Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Fish Health Inspector

Signed:

Date: 14/06/2021

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at <a href="https://www.gov.scot/publications/fish-health-inspectorate-service-charter/">https://www.gov.scot/publications/fish-health-inspectorate-service-charter/</a>
