Additional Case Information:

Fish came onto site on 17/02/2021 from Lochailort hatchery (FS1269) and Loch Lochy (FS0150).

Fish are double stocked so will begin moving to Loch Alsh on Friday 30th July.

3 Slice treatments have been conducted since fish arrived on site, one in March, one in May and the most recent one in July. Last treatment was completed on 16/07.

Florfenicol treatment conducted in March for Pseudomonas infection in Lumpfish.

Lumpfish were stocked at 12%. Mortality across the site since their input on 09/02 was 22.3% (48,499)

Salmon mortality across the site since input has been very low (2% since input).

Lep numbers have remained low since input and site manager attributes this to the presence and effectivess of the lumpfish on site. Caligus numbers increased to >1, <2 towards the end of June. Slice treatment completed in July and numbers reduced <1.

Fish were sitting deep in the water and were difficult to observe, although they appeared to be shoaling well. No moribunds or mortalities were observed on this site during the inspection.

Fish sampled for VMD appeared healthy.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

 Business No
 FB0119
 Date of Visit
 27/07/2021

 Site No
 FS0245
 Site Name
 Ardintoul

 Case No
 20210273
 Inspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at https://www.gov.scot/publications/fish-health-inspectorate-service-charter/

Date: 30/07/2021
