## **Additional Case Information:**

Fish came on from Ormsary Hatchery (FS0681) during May and June 21, with an input from Mill Burn (Old Mill) (FS0831) in June 21.

Fish were vaccinated with Micro6 and PD1 from the 12th-24th July.

Fish were all sitting deep in the water, which was very dark, and so they were difficult to observe. Individuals that were observed appeared to be in good health.

3 mortalities observed across the site but these were not fresh dead so diagnostic samples were not collected.

Fish sampled for VMD appeared healthy.

## FISH HEALTH INSPECTORATE VISIT REPORT

## SUMMARY FOR INFORMATION OF SITE OPERATOR

 Business
 No
 FB0224
 Date of Visit
 26/07/2021

 Site No
 FS0375
 Site Name
 Loch Damph

 Case No
 20210278
 Inspector

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

The above site was visited in accordance with the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015. Samples were taken to be analysed for veterinary residues.

The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

## Records

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated.

Medicine records were inspected and found to be adequately maintained.

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed: Date: 30/07/2021

Fish Health Inspector
