Inspection of stock for export to France (BDV). 36,500 21S0 from E26 and E27 being sent to BDV SAS France via Migdale.

Disinfection certificate provided for the transport lorries which were observed to be clean and disinfected. Fish inspected appeared to be in good condition.

Certificates MS/2021/0016, 0017 & 0018 completed, signed and left on site.

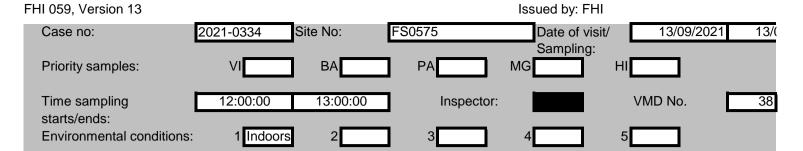

Formalin is the only treatment that has been adminstered since last inspection in response to fungal infection and postvaccination with Alphaject Micro PD1 and Micro 6.

Fish were difficult to observe across the site due to the dark peaty colour of the water. All tanks were inspected and fish were caught using a handnet in random tanks for closer inspection. Fish observed appeared to be in good health. One moribund was observed across the site that appeared to be infected with Saprolegnia sp.

Fish sampled for VMD appeared in good health.
