FHI 059, Version 13 Additional Case Information:

Fish vaccinated October 2021 with PD1 and Alphaject Micro6.

Fish have reportedly been performing well since input. Only treatments done include one Formalin bath treatment in June 21 and the use of tricaine during vaccinations in October 21.

Fish appeared in good condition and were active in the tanks. Some minor fin damage observed across the site, attributed to the cold water temperature.

Fish sampled for VMD appeared healthy.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

BUSINESS No FB0398 SITE NO FS0770 CASE NO 20210525 DATE OF VISIT 06/12/2021 SITE NAME Duartmore INSPECTOR

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

The above site was visited in accordance with the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015.

Samples were taken to be analysed for veterinary residues.

The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated.

Medicine records were inspected and found to be adequately maintained.

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Date: 13/12/2021

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at https://www.gov.scot/publications/fish-health-inspectorate-service-charter/
