FHI 059, Version 13 Additional Case Information:

Remote Inspection conducted on the 23/11/2021, physical inspection on the 30/11/2021. Mortality/movement records inspected from 29/May 2019 to w/e 21/11/2021.

2021 salmon, elevated mortalities recorded beginning wk 28, 22,359 (2.11%) across the site attributed to ERM, mortalities continued to be attributed to this for a number of weeks. Antibiotics administered. 2019 salmon, elevated mortalities attributed to treatment loss/physical damage wk 37 7572 (0.65%), elevated mortalities were attributed to bacterial infection wk38 to 49 with 50970 mortalities recorded in total

2019 lumpfish total for May 4953, June 27332, July 13764, no diagnosis. 2021 lumpfish total for June 15210, July 10896 mainly attributed to sea lice treatment losses.

7 pens inspected from the walkways due to swell, remaining inspected from the boat. Poor visibility due to rain and swell. Fish showing a good feed response.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS
 No
 FB0119

 SITE NO
 FS0599

 CASE NO
 20210539

DATE OF VISIT30/11/2021SITE NAMEMacLean's NoseINSPECTORInspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

Seven epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

R25

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Date: 16/12/2021

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at <u>https://www.gov.scot/publications/fish-health-inspectorate-service-charter/</u>
