#### FHI 059, Version 13

#### Issued by: FHI

#### **Additional Case Information:**

Fish came on from Barcaldine Smolt Unit via Fishnish. Input at Fiunary in wk21 2021. Four treatments have been conducted since input: Salmonsan and Azasure in May/June 21, Alphamax and Paramove in September 21. Fish are performing better this year and have good gill scores and low lice numbers. CMS has been confirmed by PCR and histology samples taken in January 22, but not causing significant mortalities.

Wildcaught wrasse were input in June 21 and have been performing well to keep lice numbers low. Original input was 24,900 (6,150 mortalities since input (24%).

Site using Optomease this crop as anaesthetic for sea lice counts (alternative to Tricaine). Active ingredient is Benzocaine.

Site is doing live haul harvests. Harvesting is ongoing and fish are taken to South Shian for processing.

Fish were sitting deep in the cages but those that were observed appeared active and in good condition, with the exception of a few individuals who had lesions on their flank. These fish were also quite active and were not moribund, so no attempt was made to remove them with a handnet.

Fish sampled for VMD appeared healthy externally and internally.

Sea Lice Inspection (Seawater Sites Only)		
1. Has the site experienced sea lice problems		N
2. Is the CoGP Farm Management Area (or ed		
3. Does the site have access to a range of lice azamethiphos and emamectin benzoate) as a can these be deployed in a reasonable period	well as access to suitable biological and/or	
4. Is there a signed documented farm manage Management Area (or equivalent)?	ement agreement or statement relevant to	the site and CoGP Farm Y
5. Are sea lice count records available for insp	pection? (Legal SSI, CoGP Annex 6)	Y
6. Do records adequately reflect the required	standard specified in the SSI and the CoG	P? (Legal SSI, CoGP Annex 6) Y
7. Are sea lice ( <i>L. salmonis</i> ) record levels believels are inspected? (CoGP Annex 6)	ow the suggested criteria for treatment in the	he CoGP during the period that N
8. Have average adult female sea lice ( <i>L. salr.</i> 2 or above (from w/b 10/6/19) during the period		3 or above (prior to w/b 10/6/19) or N
If yes, have these been reported to the Fish H	ealth Inspectorate? If no, FHI see commer	nt. N/A
9. Is <i>C. elongatus</i> infestation at a level which	is considered to cause significant welfare p	problems? (CoGP 4.3.81, 5.3.50) N
10. Have therapeutic treatments been adminis suggested criteria for treatment or where <i>C</i> .		
11. Has any other action been taken (where a	pplicable)?	Y
12. Have therapeutic treatments or the actions	s taken had a significant impact upon the li	ce levels recorded? Y
13. Are treatments, where conducted, carried	out in cooperation between participating fa	irms? Y
14. Is there a harvesting strategy for the site, sea lice?	where fewer populations or part population	s are held without treatment for Y
15. Is there a site specific written lice manage scenarios during the escalation of a sea lice in		set actions to deal with recognised Y
16. Do the sea lice levels observed on stocks	reflect sea lice count data? If no please de	tail reasons.
Containment Inspection		
1. Has the site experienced equipment damage	ge due to predators in the current or previo	us production cycles?
2. Are measures in place to mitigate against the	he predation experienced on site? (Detail b	pelow) Y
HDPE nets, top		
If other, detail below:		
3. Have escape incidents or events been exp	erienced on or in the vicinity of the site sine	ce the last FHI inspection? N
If Yes proceed with questions 4 – 9. If No skip	to question 10	
4. Have these been reported to Scottish Minis	ters?	
5. Have these been reported to local DSFB fo	rthwith (where they exist)? (CoGP - 4.4.37	7, 5.4.17)
6. Have these been reported to the SSPO and	l local fisheries trusts forthwith (where they	exist)? (CoGP – 4.4.37, 5.4.17)
7. Were methods (if any) used to recover esca	apees? If yes give detail	
8. If gill nets were deployed was this action ag	reed with local wild fish interests and was	permission given by Scottish
Ministers? (Legal, CoGP – 4.4.38, 5.4.18)		
9. What action was taken to prevent and minin		red in code but could
be considered under satisfactory measur		
10. Is the site inspected as satisfactory with re-	egards to containment? If no, please detail	reason(s) Y

## Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

# Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

### Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
