Additional Case Information:

Mort event reported 7/12/20 3.27% (7348 fish) attributed to post peroxide tarp treatment.

wrasse on farm wild source, Tobermory and Orkney. Delivery yesterday from **Constant and Constant and Constant**

Mort disposal; incinerated on site. No other movements off dead.

Current morts in salmon attributed to gill issues. Gill scores high currently of PGD, and increasing for AGD, 4/9 positive from last gill swabs. Plankton bloom July and early September.

Last month a fishing vessel run aground next to the site and a sheen of diesel passed over the site twice. Feeding was stopped at the time.

Week 31 until week 35 2022- furunculosis. Treated with florical. 150 degree days withdrawal except the wrasse - whole site treated. 23rd August 10 day treatment. Morts 1.50% cage 8, 1.39% cage 9 week 33 peak mortality. Lost M&S status due to use of antibiotics.

Anaesthetic used on site is Optomease benzocaine which has a withdrawal period is 7degree days when used according to prescription. Fish are not currently on withdrawal

Last sea lice count; 0.02 adult females, all stages 3.98, average mobile 1.31

Tarp treatment alphamax 18,19 August 2022 last lice treatment. None planned currently.

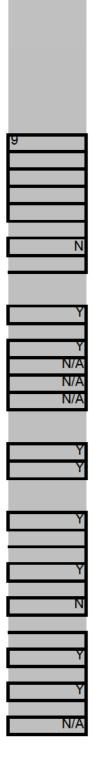

Not recording person who is conducting the lice counts -will be done going forward.

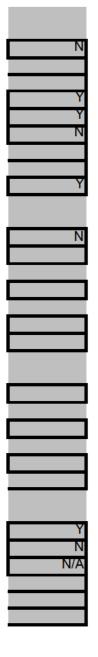

Thermoliced cage two 10/8/22 as lice numbers higher that rest of site,

No site manager in place for the site and area health manager could not attend at last minute - all documentation was not available during inspection. Have requested; BMP, site specific lice management plan, FMS and health reports. Update 13.2.23 Site visit conducted 8/2/23- case 20230043 and issues resolved.

Case completion report

Issues were raised in relation to the above case, with a requirement for records unavailable for inspection to be submitted by 30 December 2022. Records were not provided by this date but the site was revisited by Marine Scotland on 8 February 2023. The records were inspected and found to be adequate.

This case will now be closed. This site may be subject to further audit and recommendations in the future.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

DATE OF VISIT04/10/2022SITE NAMELismore WestINSPECTORInspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were not available for inspection. A copy of the results of animal health surveillance must be submitted to the Fish Health Inspectorate for inspection by 30 December 2022.

The biosecurity measures plan for the site was not available for inspection. A copy of the biosecurity measures plan must be submitted to the Fish Health Inspectorate for inspection by 30 December 2022.

This must be addressed to ensure the conditions of authorisation for your Aquaculture Production Business (APB) are being met. Records or documentation demonstrating that these points have been addressed should be sent to the Fish Health Inspectorate (contact details below).

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to escapes.

The site specific sea lice management procedure was not available for inspection. A copy of the farm lice management procedure must be submitted to the Fish Health Inspectorate for inspection by 30 December 2022.

The farm management agreement/statement was not available for inspection. A copy of the farm management agreement/statement must be submitted to the Fish Health Inspectorate for inspection by 30 December 2022.

Please ensure that these points have been addressed by 30 December 2022. Records or documentation demonstrating that these points have been addressed should be sent to the Fish Health Inspectorate (contact details below). The site may be subject to further inspection or enforcement action should the appropriate action regarding the above points not be taken within the time period stipulated.

Please contact myself or the duty inspector should you require any assistance or clarification in implementing any requirement or recommendation detailed in this report.

Signed:

Date: 01/12/2022
