FHI 059, Version 13		Issued by: FHI	Date of issue: 12/05/2020				
Case No: 2022-0570			Date of visit: 23/11/2022				
Time spent on site:	2 hours	Main Inspecto	or:				
Site No: FS1099	Site Name:	Gletness					
Business No: FB0125	Business Name:	Scottish Sea Farms Ltd					
Case Types: 1 REG	2 3	4 5	6				
Water Temp (°C):	Thermometer No:		FHI 045 completed N/A				
Observations:	Region: SH	Water type: S	CoGP MA S-9				
Dead/weak/abnormally behaving fish present? N/A If yes, see additional information/clinical score sheet.							
Clinical signs of disease observed? N/A If yes, see additional information/clinical score sheet.							
Gross pathology observed?		N/A If yes, see additional information/clinical score sheet.					
Diagnostic samples taken?		N/A					
UNI/REG only - if unable to carry out intended visit detail reason below:							
Weather too rough - 50mph winds.							

Additional Case Information:

No cleanerfish on site.

Mortalities have gone to Setterness so delivery notes will be up at Setterness. No delivery notes from this cycle currently. Next bin of mortalities will go to Energy Recovery Plant (Lerwick) as mortalities increase.

SLICE treatment - 31st October - 6th November.

Inspection of pens could not be undertaken, as weather was too rough to get onto site. Points in biosecurity records checked to ensure that procedures were recorded, however assessment of whether they were implemented on site could not be conducted.

AMENDED FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

 Business No
 FB0125
 Date of Visit
 23/11/2022

 Site No
 FS1099
 Site Name
 Gletness

 Case No
 20220570
 Inspector

This report replaces the fish health report R10 issued on 27/01/2023 by ______. The previous report should be discarded. Some of the records which were checked during the inspection could not be fully assessed, as the inspector was unable to get on to pens, due to adverse weather conditions.

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

Due to adverse weather conditions epidemiological units were not physically inspected.

Records

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and found to be inadequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

No animal health surveillance had been carried out on behalf of the business and/or Marine Scotland since the last Marine Scotland Inspection.

The following points were raised with the site representative during the inspection:

• FS numbers were not recorded in the movement book. These were added to the movement book during the inspection and it was discussed with the manager that these were to be included for any future movements on or off site. No further action.

These must be addressed to ensure the conditions of authorisation for your Aquaculture Production Business (APB) are being met.

R10

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at www.gov.scot/Topics/marine/Fish-Shellfish/FHI/charter
