Dead/weak/abnormally behaving Clinical signs of disease observe Gross pathology observed? Diagnostic samples taken?		Y If yes, see addit	tional information/clinical tional information/clinical tional information/clinical	score sheet.
UNI/REG only - if unable to carry	out intended visit detail	reason below:		

FHI 059, Version 13

Additional Case Information:

The company makes a treatment plan on a case by case basis for lice management procedures and harvest strategies where parts of the population need to be held without treatment.

Farm management area is not fallowed synchronously as it includes both Cooke and Scottish Sea Farm sites.

Paperwork completed over teams 27/06/2023

Mortality event Wk19 2023 was not reported as it was within the 6 week post stocking period.

Site inspection and VMD samples carried out 28/06/2023.

During inspection of the pens on site a total of 7 moribund fish were observed hanging by the edges of pens. All other fish were deeper in the water column and shoaling together. Feed responses observed were good. A few fish were observed swimming with their mouths permanently open. The manager confirmed these fish were dubbed "screamers" and were unable to close their mouths at all however despite this a number of these fish were growing well.

Fish sampled for VMD appeared healthy externally and internally.

Case No: 2023-0281	Site No:	FS1020
Sea Lice Inspection (Seawater Sites Only)		
 Has the site experienced sea lice problems Is the CoGP Farm Management Area (or ed) 		vear class basis?
3. Does the site have access to a range of lice azamethiphos and emamectin benzoate) as a can these be deployed in a reasonable period	enced in-feed and bath sea lice medications (in well as access to suitable biological and/or me	ncluding deltamethrin, Y
4. Is there a signed documented farm manage Management Area (or equivalent)?	ement agreement or statement relevant to the	site and CoGP Farm Y
5. Are sea lice count records available for insp6. Do records adequately reflect the required s		(Legal SSI, CoGP Annex 6) Y
7. Are sea lice (<i>L. salmonis</i>) record levels belorecords are inspected? (CoGP Annex 6)	ow the suggested criteria for treatment in the C	CoGP during the period that N
8. Have average adult female sea lice (<i>L. saln</i> 2 or above (from w/b 10/6/19) during the perio	<i>,</i> .	above (prior to w/b 10/6/19) or N
If yes, have these been reported to the Fish H 9. Is <i>C. elongatus</i> infestation at a level which	· ·	olems? (CoGP 4.3.81, 5.3.50) N
10. Have therapeutic treatments been adminis suggested criteria for treatment or where C. e		
11. Has any other action been taken (where a		N/A
12. Have therapeutic treatments or the actions		
13. Are treatments, where conducted, carried		
14. Is there a harvesting strategy for the site, v sea lice?	where fewer populations or part populations a	re held without treatment for N/A
15. Is there a site specific written lice manage scenarios during the escalation of a sea lice in		actions to deal with recognised N/A
16. Do the sea lice levels observed on stocks	reflect sea lice count data? If no please detail	reasons. Y
Containment Inspection		
1. Has the site experienced equipment damage	je due to predators in the current or previous p	production cycles? N
2. Are measures in place to mitigate against the	ne predation experienced on site? (Detail belo	w) Y
If other, detail below:		
Top nets, tensioned sapphire seal pro nets, pe	est control on barge	
3. Have escape incidents or events been exp	-	he last FHI inspection?
If Yes proceed with questions 4 – 9. If No skip	-	
4. Have these been reported to Scottish Minis	ters?	
5. Have these been reported to local DSFB fo	rthwith (where they exist)? (CoGP - 4.4.37, 5	.4.17)
6. Have these been reported to the SSPO and	l local fisheries trusts forthwith (where they exi	ist)? (CoGP – 4.4.37, 5.4.17)
7. Were methods (if any) used to recover esca	apees? If yes give detail	
8. If gill nets were deployed was this action ag	reed with local wild fish interests and was per	mission given by Scottish
Ministers? (Legal, CoGP – 4.4.38, 5.4.18)

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS NO
 FB0095

 SITE NO
 FS1020

 CASE NO
 20230281

DATE OF VISIT28/06/2023SITE NAMEBay of VadyINSPECTORInspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as low. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every third year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Records in relation to aquaculture animals transported by the business were inspected and found to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed: Fish Health Inspector

Date: 11/07/2023

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Marine Scotland website at https://www.gov.scot/publications/fish-health-inspectorate-service-charter/
