#### **Additional Case Information:**

Salmon came on from Barcaldine Smolt Unit (Stofinfisker origin) and Girlsta Hatchery (Aquagens). Stofinfisker stock is reported to be performing well, however the Aquagen stock reduced feeding in recent weeks and the decision has been made to begin harvesting these cages. Reduced feeding combined with the presence of AGD/CGD on site has resulted in the entire Loch now being placed on a harvest plan, with all Kishorn sites expected to be fallow in the coming months. Livehaul harvests are taken to South Shian

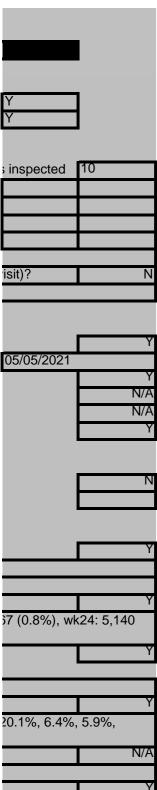

Wildacaught wrasse have come on from Orkney over several movements in July/August/September 22 and June 23. The lumpfish on site were imported from Ireland in Nov 22. Wrasse morality since input: 5,157 (12.17%). Lumpfish mortality since input: 9,413 (23.53%).

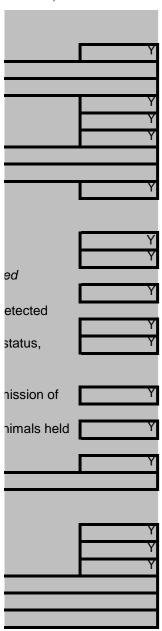

Site staff had already removed moribunds in advance of the inspector arriving on site, so none were observed in any of the cages. Some lethargic fish were observed in most of the cages on site and had higher than average lice loads (compared to the general population) with some damage to the base of the dorsal fin and top of the head noted. These fish however, were responding to movement and could not be caught using the hand net, so were not sampled. The general population of fish that were sitting deeper in the water and shoaling well, appeared in better physical condition, with lower lice loads and higher body weights.

Fish sampled for VMD appeared in good physical health externally and internally upon examination.

# FISH HEALTH INSPECTORATE VISIT REPORT

### SUMMARY FOR INFORMATION OF SITE OPERATOR

 Business No
 FB0125
 Date of Visit
 18/07/2023

 Site No
 FS0804
 Site Name
 Kishorn B (North)

 Case No
 20230314
 Inspector

# Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

### Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

# Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

## Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed: Date: 24/07/2023

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)
