FHI 059, Version 13 Additional Case Information:

Fish came on from Barcaldine in June/July last year and were performing well until recent months when feeding reduced. Wrasse are wildcaught and lumpfish came on from Ireland in December 22.

Wrasse mortality since input: 7,915 (23.87%). Lumpfish mortality since input: 11,297 (22.59%).

AGD/CGD on site has been attributed to elevated mortality in recent weeks. Entire Loch is now on a harvest plan, removing the worst affected cages first. Live haul harvest are taken to South Shian.

Freshwater treatments have been conducted since the beginning of the year but business wants to reduce handling before harvest.

Site staff had already removed moribunds in advance of the inspector arriving on site, so none were observed in any of the cages. Some lethargic fish were observed in most of the cages on site and had higher than average lice loads (compared to the general population) with some damage to the base of the dorsal fin and top of the head noted. These fish however, were responding to movement and could not be caught using the hand net, so were not sampled. The general population of fish that were sitting deeper in the water and shoaling well, appeared in better physical condition, with lower lice loads and higher body weights.

Fish sampled for VMD appeared in good physical health externally and internally upon examination.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

 BUSINESS NO
 FB0125

 SITE NO
 FS1274

 CASE NO
 20230315

DATE OF VISIT18/07/2023SITE NAMEKishorn WestINSPECTORInspector

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Fish Health Inspector

Date: 24/07/2023

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)
