FHI 059, Version 13	lssu	ied by: FHI	Date of issue: 12/05/2020
Case No: 2023-0317			Date of visit: 19/07/2023
Time spent on site:	4hrs	Main Inspect	or:
Site No: FS1342 Business No: FB0169	Site Name: Business Name:	West Strome Bakkafrost Scotland	
Case Types: 1 ECI	2 CNA 3 SLI	4 VMD 5	6
Water Temp (°C): 11.7	Thermometer No:	T152	FHI 045 completed
Observations:	Region: HI	Water type: S	CoGP MA: M-20
Dead/weak/abnormally behavin Clinical signs of disease observ Gross pathology observed? Diagnostic samples taken? UNI/REG only - if unable to carr	ed?	Y If yes, see additional info N If yes, see additional info N	rmation/clinical score sheet. rmation/clinical score sheet. rmation/clinical score sheet.

FHI 059, Version 13 Additional Case Information:

Salmon came on from Loch Damph and Applecross and have been performing well so far this cycle. Yersinia ruckeri was detected in May 23 and was attributed to increased mortality at the site in wks20 and 21. Mortality has since reduced.

Cleanerfish mortality since input -Farmed wrasse: 3,861 (14%) Farmed Lumpsuckers: 38,362 (63%)

Lice numbers have been very low so far this cycle. Slice treatments were carried out in April and June 23. All other treatments have been freshwater and flushes.

Salmon will be livehaul harvested to Stornoway.

Freshwater and flush treatment completed on Monday 17th July. Lethargic fish were observed across the site with some physical damage to eyes and flank, but were responsive to movement and could not be caught with a hand net so were not sampled. Feed was used to bring the fish to the surface for closer inspection as the water was dark and the general population were difficult to observe. These fish appeared in good body condition and had a strong feed response.

The fish that were removed for VMD sampling appeared in good physical health externally and internally upon examination.

.1. Have escape incidents or events ¹ been experienced on or in the icinity of the site since the last MSS inspection?		N			
-	High		AAAH Regs ⁴ 31	D,E	
 .3. Have these been reported to the SSPO² and, where in existence, the local DSFB and fisheries trust? .4. Were methods (if any) used to recover escapees? 	Medium		CoGP 4.4.37, 5.	4.17	
yes give detail .5 Was the decision to attempt to recapture and the method mployed agreed with the local DSFB and FT	Low	<u> </u>	CoGP 4.4.38, 5.	4.18	
.6. Was permission sought from Marine Scotland prior to ecapture?	Medium		CoGP 4.4.38, 5.		
.7 Were the gill nets deployed in accordance with the permission ssued by Marine Scotland?	Low		CoGP 4.4.38, 5.	4.18	
.8. In light of the escape event, has appropriate action been taken o prevent and minimise the risk of further escapes?	High				
I.9. Is there a site specific contingency plan in response to failures n containment, aimed at preventing escapes and recovering escaped fish?	High	Y	SSI, 2,9		Contingency plan details measures in place for the containment of stock and actions to take in the event of an escape/suspected escape. Includes emergency contact numbers.
	ha alta				
(i). Inspection of records relating to equipment, facilities and t	ne site				
Seneral records .1 With regard to each facility, net, screen and mooring at each ite, a record should be maintained of:-			CoGP: 4.4.9, 4.4 SSI 2,1	ł.14,	
a) The name of the manufacturer	Low	Facilities Y	Moorings Y	Nets Y	Attestations and invoices provided for each component of equipment which included all required information.
b) Any special adaptations	Low	Y	Y	Y	
c) The name of the supplier	Low	Y	Y	Y	Installation attestation for moorings inspected. Northwest Marine installed moorings attestation included a statement of competancy.

Point of compliance	Risk level	Satisfactory?	Requirement		Comments and advice given or action taken if necessary
d) The date of purchase	Low	Y	Y	Y	
e) Each inspection including					
i) the name of the person conducting the inspection	Low	Y	Y	Y	Environmental surveys completed and suplied to gaelforce to provide moorings suitable for site conditions.
ii) the date of each inspection	Medium	Y	Y	Y	
iii) the place of each inspection	Low	Y	Y	Y	Daily equipment check sheet supplied and inspected.
iv) the outcome of each inspection	High	Y	Y	Y	Rov report inspected. Moorings were well tensioned and burried appropriately. No repairs required.
f) the date and result of each repair, equipment test and antifouling treatment carried out	High	Y	Y	Y	
2.2. In relation to each net a record of:					
i) The mesh size	Medium	Y	SSI, 2,2		Knox portal was accessed where the required records were inspected and found to be appropriate.
ii) The code which appears on the identification tag	Medium	Y			
iii) The place of use, storage and disposal	Medium	Y			
iv) The depth of water between the bottom of the net and the seabed as measured at the mean low water spring	Low	Y			Site plan inspected.
2.3. In relation to each facility a record of:					
i) The date of construction	Low	Y	SSI, 2,3		Attestations and invoices provided for each component of equipment which included all required information.
ii) The material used in construction	Low	Y	1		
iii) Its dimensions	Low	Y	1		
2.4. In relation to each mooring a record of-			SSI, 2,4		
i) The date of installation	Low	Y	1		
ii) The design and weight of the anchors	Low	Y	1		
iii) The length of the mooring ropes or chains	Low	Y			
2.5. A record of any navigation markers deployed at each site at which fish are farmed	Low	Y	SSI, 2,5		
2.6 In respect of sites at which fish are farmed in inland waters ³			SSI, 2,6		
a) The type, method of and date of construction of any flood prevention or flood defence measures in place	Low	N/A	1		
b) The date of and results of any tests conducted on any such measures	Low	N/A	1		
c) The date of any incident where the site was flood	Low	N/A			
d) The water course height during any such flood incident 2.7 A record of-	Low	N/A	SSI, 2,7		
a) The date of any severe weather event which caused damage to any facility, net or mooring	Medium	Y	SSI, 2,11 (a)		Any severe weather event is recorded in the site diary and stock containment checklist.
b) Any action taken to rectify any such damage	High	Y	SSI, 2,11 (b)		Any repairs are noted in the site diary and stock containment checklist.

Point of compliance	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
Pen and mooring systems				
2.8 Are there documented procedures maintained regarding the selection and installation of pens and moorings?	High	Y	CoGP 4.4.8, 4.4.13	Attestations and equipment design profiles were provided for the cages on site.
	High	Y	CoGP 4.4.9, 4.4.14	
2.10 Do pen systems meet the manufacturers guidelines?	High	Y	CoGP 4.4.10	
2.11 Are pen systems inspected and approved by suitably qualified / experienced person(s)?	High	Y	CoGP 4.4.11	Cages are selected and installed by compentant industry leaders. Site staff are trained in stock containment and cages are inspected daily for damage.
2.12 Is there evidence of the competence of personnel involved in the design, installation and maintenance of pen and mooring systems?	High	Y	CoGP 4.4.12, 4.4.15	Reputable companies sourced for design and supply of cages based on environmental surveys.
 2.13 Are pen and mooring components inspected with a) a documented SOP b) a documented inspection plan based on a risk assessment 	High	Y	CoGP 4.4.16	Rov brought in at the end of each cycle to inspect moorings and carry out any required repairs. ROV report supplied and inspected.
2.14 Do all nets used on site meet industry standards?	High	Y	CoGP 4.4.17	
2.15 Can the site demonstrate an awareness of the minimum fish size in relation to net size	High	Y	CoGP 4.4.19	Real-time data on fish weight and size is recorded. Net mesh size is also recorded and is appropriate for the stock on site.
2.16 Does the net design, quality and standard of manufacture take into account the conditions that are likely to be experienced on site and include adequate safety margins?	High	Y	CoGP 4.4.20	Nets are selected based on environmental surveys to ensure they are adequate for the conditions experienced on site.
2.17 Are nets treated with a UV inhibitor?	Low	N	CoGP 4.4.21	Not UV treated but stored out of direct sunlight.
2.18 Are nets tested at a pre-determined frequency?	High	Y	CoGP 4.4.22	Nets are removed from the site and returned to Knoc at the end of every production cycle.
2.19 Is the method of test procedure based upon the manufacturers advice?	High	Y	CoGP 4.4.22	Knox strength test the nets and conduct any repairs required before returning to the site before the next production cycle begins.
2.20 Are frequent net inspections conducted to look for damage?	High	Y	CoGP 4.4.23	Divers are on site once a fortnight to inspect the nets, but are also available at short notice should a breach in containment be suspected. Site also has access to an ROV and net washing cameraswhich are used every 10 days.
2.21 Are net inspection records maintained?	High	Y	CoGP 4.4.23	Knox reports, diver reports and ROV reports were available for inspection.
2.22 Is the system by which nets are attached to the pen and	High	Y	CoGP 4.4.24	
weighted inspected frequently?	High	N/A	CoGP 4.4.25	

b(ii). Inspection of records relating to training

Issued by: FHI

Point of compliance	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
3.1 Are training programmes and plans relevant to the various onsite activities documented?	High	Y	CoGP 7.1.8	All site staff are trained in stock containment and boat handling, whinch training and handling events. SOPs were available for inspection and found to be adequately planned.
3.2 Is there a satisfactory record of all training and qualifications for each person working at the site in relation to any boat operations? (This excludes well boat operations)	High	Y	SSI 2,6,a	4/5 staff are trained in operating boats on site, holding their day skipper ticket, powerboat level 2 and commercial endorsement licence.
3.5 With respect to any transfer of or handling of fish is there a record of all training of each person working on site in relation to containment and prevention of escape of fish, and recovery of escaped fish?	High	Y	SSI 2,7,a	Several SOPs were available for inspection for various handling activities that are conducted on site.
b(iii). Inspection of records relating to procedures and risk asse	ssments			
4.1 Are procedures which could increase the risk of fish escaping considered to be carefully planned and supervised to minimise risk?	High	Y	CoGP 4.4.29, 5.4.12	SOPs available for handling activities that lay out operations and safe handling of equipment to reduce the risk of a breach in containment.
4.2 Before procedures are conducted on site, are the following in place:			CoGP 4.4.30, 5.4.13 SSI 2,7, b , SSI 2, 8, c	
a) a documented risk assessments	High	Y		
b) standard operating procedures	High	Y	1	
c) contingency plan	High	Y	1	In addition to the above, a contingency plan was also available in the event of a suspected breach in containment.
4.3 In relation to any boat operations at each site at which fish are farmed is there a record of				
-The type and size of each boat used for operations on the site	Low	Y	SSI 2,6,b	MECAL compliance examination report available for each boat on site which included the specifications of each craft.
- The type and size of any propeller guard fitted to each boat used on the site	Low	Y	SSI 2,6,c	
4.4 Does the site suffer from regular or heavy predation?		Ν	1	
4.5 Are there records of site specific risk assessments ascertaining the risk of predator attack?	Medium	Y	CoGP 4.4.26	Predator control risk assessment and predator exclusion plan available for inspection.
4.6 Are there risk assessments undertaken on a pre-determined frequency?	Low	Y	CoGP 4.4.26	These are reviewed before each new cycle.
4.7 A record of any anti-predator measures undertaken at each site at which fish are farmed including:			SSI, 2,8,a	
The type and location of each net, fence and scarer deployed	Medium	Y		Details of the anti-predator measures deployed on site were included in the site plan.
- The use of lethal means by any person involved in operations on the site	Low	N/A	SSI, 2,8,b	
4.8 Where predator nets are deployed is the advice of Annex 7 considered?	Low	N/A	CoGP 4.4.27	

Point of compliance	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
c. Inspection of site and site equipment				
5.1 Are there any obvious containment issues on the site?	High	Ν		Site was tidy and all nets were secure at the time of inspection.
5.2 Is the net mesh size considered to be capable of containing all fish sizes present on site?	High	Y	CoGP 4.4.18	

Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
Low	Y	SSI 2,2 ii	
Low	Y		Net ID tags on cages 1, 3 and 12 were inspected. ID tags were then compared to the intended net locations as recorded in the Knox portal and were found to be accurate.
Low	Y	CoGP 4.4.21	Nets are not stored on site. If they are removed from a cage, they are sent back to Knox for service/repair/storage. Knox store all nets out of direct sunlight.
?	Y		Sealpro nets have been installed and have been successful at deterring predators. Headline nets are stitched and top nets are also in place.
s High	Y	CoGP 4.4.28	
Low	Y	MSA ⁵ 2010 P4, S21	
Low	Y	MS Marine licence	
Low	Y	SSI 2,5	Site plan details location of navigational markers.
High	Y	CoGP 4.4.31	SOPs available for handling events, detailing the steps that should be taken in order. Staff are all trained in stock containment which covers such activities.
		CoGP 4.4.32	
High	N/A		No helicopter transfers are conducted at this site. Transfer of fish is generally by wellboat.

ENHANCED CONTAINMENT INSPECTION

An enhanced inspection to ascertain the risk of escape from the fish farm was conducted in accordance with the Aquaculture and Fisheries (Scotland) Act 2007.

The visit consisted of an inspection of facilities, records and the provision of advice.

a) Inspection of i) escape incidents and ii) contingency procedures

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

b)i) Inspection of records relating to equipment, facilities and the site

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

b)ii) Inspection of records relating to training

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

b)iii) Inspection of records relating to procedures and risk assessments

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

c) Inspection of site and site equipment

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

d) Inspection of site specific procedures

No site-specific procedures were observed during the inspection.

Further Action

The site meets the requirement of current Scottish industry best practice. No further recommendations are made, or further action required.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements.

An enhanced containment inspection was conducted. A separate report will be issued in due course.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
