FHI 059, Version 13 Additional Case Information:

Wrasse are wildcaught from around Gairloch, Loch Ailort, Mull and Uig and lumpfish were transferred from Ocean Matters (Anglesey).

Cleaner fish mortality since input - wrasse 25,185 (17%) and lumpfish 10,716 (6.9%).

Salmon came on from loch ailort at the beginning of 2023 and are reported to be performing well so far. Micro jellyfish were present in the water from June until last week so feeding was reduced to avoid interaction. Feeding increased again once volume of jellies had reduced.

Lep and Caligus numbers very low since last inspection. Calagus beginning to increase so site has an Alphamax treatment planned for wk29 followed by a prophylactic Slice treatment.

Live haul harvests are taken to Mallaig.

Deltafav treatment (Alphamax) was completed on Monday 17th and site manager reported a 90% clearance in calagus from the fish following an increase over the weekend. A slice treatment had begun on the day of inspection.

No moribunds were observed on the site and fish appeared in good physical health and were active in the cages. Fish sampled for VMD also appeared in good condition externally and internally upon examination and demonstrated a strong feed

DATE OF VISIT20/07/2023SITE NAMEArdintoulINSPECTORImage: Constraint of the second se

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to parasites, fish farm management agreements and statements and containment and escapes.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Signed:

Date: 24/07/2023

Fish Health Inspector

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)
