Additional Case Information:

Fish moved on from Toyness in march 2023 - toyness is a nursery site.

Stock origin: Knock and barcaldine (stofnfiskur and aquagen)

Treatments: FW- 23/03 to 06/04, Wk 12, all pens: FW treatment at input - 0.85% 5400, mortality below threshold. Slice Wk 19, all pens Slice Wk 25, all pens FW wk 27, all pens

All harvests are conducted via live haul. Optomease used instead of T.M.S before end of crop due to shorter withdrawal time.

Health surveillance: weekly gill swabs, but usually once a month health visits conducted.

08/08/2023 - gill swabs - no AGD detected. Site has also bee seeing mild bloody spotting initially thought to be due to caligus but determined that jellyfish are issue.

non-synchronous fallow risk assessment available as sites in FMA do not fallow synchronously: inspected 17/08/2023 FMA- reviewed annually, but discussed every 6 months.

During site inspection, seagulls were observed landing on bird net and weighing it down. Site has highlighted that birds are an issue but all mitigation measures in place. In addition, an upside down fish was observed in pen 8, removed to inspect it and deemed that no clinical signs were observed and therefore no diagnostic sample taken.

1 fish was removed for VMD sampling and was observed to be in healthy condition. Fish on site were observed to be shoaling well and feeding well too.

In addition to the routine inspection, a statutory inspection was conducted due to confirmation of BKD at Chalmer's Hope (FS0993) - within one tidal excursion of the inspected site. The inspection was conducted to rule out signs of clinical BKD. No fish were observed with signs of clinical BKD.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

BUSINESS NO FB0125 SITE NO FS1023 CASE NO 20230364 DATE OF VISIT 22/08/2023 SITE NAME INSPECTOR

Bring Head

Statutory Inspection

The above site was inspected as it is located within one tidal excursion of a site where the presence of bacterial kidney disease (BKD) has been confirmed.

All epidemiological units were inspected. No clinical signs associated with BKD were observed.

If clinical signs of BKD are observed on the site, the Inspectorate must be informed immediately.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Fish Health Inspector

Signed:

Date: 25/08/2023

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)
