Additional Case Information:

All mortalities and culls are incinerated on site (noted by weight on record). Incineration log inspected 21/11/2023, therefore records have been noted as available.

Transport records: captured in mortalities as transfer morts.

As a broodstock site, does not fallow synchronously on a single year class basis. This is noted in the farm management statement that was inspected 21/11/2023. No harvesting takes place on site.

Harvesting strategy not required as site has land based tanks and are able to treat easily.
