# FHI 059, Version 13 Additional Case Information:

Mortalities over threshold: Wk33: 1.3% (4,043) Wk37: 1.1% (3,367 Wk38: 3% (9,235) Wk41: 2.6% (7,636) Wk42: 6.5% (18,784) Wk43: 12.3% (33,604) Wk44: 9.6% (22,855) wk45 - 7.1% (15,357) Wk46 - 3.7% (7,476) Wk47 - 4.7% (11,145) Wk48 - 5.3% (13,444) Wk49 - 2.71% (6,685) Wk50 - 1.4% (3,288)

All mortality events have been attributed to poor gill health (CGD) combined with FW treatment losses in Wk48, 49 and 50 2023. Wrasse mortality since input for farmed stock was 45.69% and 27.28% for wildcaught stock.

Average adult female leps combined has remained below the CoGP treatment threshold since last EC inspection in April 2022.

Two batches of fish received onto site. One input in February 23, followed by a 2nd input in April 23 (within 6 weeks of each other). A mix of Fanads and Aquagens are currently on site and all came on through Barcaldine and Fada.

Site is stocked with a mix of farmed and wildcaught wrasse and site manager reported them to be effective at controlling sea lice on the site.

Lesions have been observed on some fish across site but appear to be healing well. Fish are being fed a skin assist diet to aid recovery and will soon move onto a Resist X diet to support gut function.

SLICE was administered in February 24, following a peroxide treatment in Nov 23.

General population of fish on site appeared in good external health, with a handful of individuals across the site appeared in poor health and were exhibiting skin lesions. These were removed during the inspection and humanely culled. No other clinical signs of disease were observed so diagnostic samples were not taken on this occassion.

The fish sampled for VMD was clinically healthy externally and internally and demonstrated a good feed response. Gut was full of food on examination.

Remote inspection completed on 21/03/24. Site visited on 26/03/24.

ENHANCED SEA LICE INSPECTION CHECKLIST				
a. Inspection of sea lice records 1.1 Are sea lice count records available for inspection?	Medium	V	CoGP 1.2.1, 1.2.2,	
1.2 Do records adequately reflect the required standard specified in	Low & Medium	Ť Y	Annex 6	
the $SSI^1$ and the CoGP <sup>2</sup> ?			SSI 1,2,	
(Counts should be weekly, record the person making the count, date				
of the count, number of fish sampled (should be 25), pen or facility				
number recorded, water temperature <sup>3</sup> , number of parasites observed				
and correct stages recorded <sup>4</sup>				
1.3 Where weekly counts are not conducted is the reason for not	Low	Υ	SSI 1,2(g)	
conducting the count stated?				
1.4 Is that reason considered acceptable by the Inspector? Give	Low	Υ		
detail.				
1.5 Has the site experienced sea lice problems in the previous 4		Ν	Detail if necessary:	
years? b. Inspection of records relating to treatment and control of sea li		<b>I</b>		
2.1 Has appropriate action been taken where:		1		
a) L. salmonis record levels have been above the suggested criteria	High	N/A	CoGP Annex 6	Not been above the CoGP suggested criteria for treatment since last
for treatment?				inspection.
b) C. elongatus infestation is at a level considered to cause significant	High	N/A	CoGP 4.3.81, 5.3.50	The average Caligus count (for all stages) has not been above 0.84
welfare problems				since the last inspection.
2.2 Is therapeutic treatment initiated ASAP where required?	Medium	Υ	CoGP 4.3.130, 5.3.84	
2.3 Where medicines have been administered there should be a			VMD <sup>12</sup> 19	
record of :			SSI 1,3	<b>-</b>
the name / identity of the product	High	Y		Treatment records inspected and found to be adequately maintained.
the date of administration	High	Y		
the quantity (concentration and amount) administered	High	Y		
the method of administration of the product	High	Y		
the identification of the fish / facilities treated	High	Y		
name of the person administering the treatment	Low	Y		
the withdrawal period	Medium	Y		
2.4 If the medicine is administered by a veterinary surgeon:			VMD 18	

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
the name of the veterinary surgeon	High	N/A		Prescriptions from the vet were available for inspection, however administration of medicines is conducted by a trained member of site staff.
name of the product	High	N/A		
batch number	High	N/A		
the date of administration	High	N/A		
amount administered	High	N/A		
identification of fish treated	High	N/A		
withdrawal period	Medium	N/A		
2.5 Have therapeutic treatments or the actions taken had a significant impact upon the lice levels recorded?	High	Y		
Inspect records to confirm. Significant impact - ≥50% reduction in site average <i>L.salmoni</i> s numbers (all stages)				
2.6 If other methods are employed on site to control sea lice and their impact is there a record of:	Low	Y	SSI, 1,4	Wrasse have been stocked onto site to control sea lice loads and are reported to be performing well. Sealice records reflect low levels.
the nature and date of the method employed; the identification number of all facilities subjected to the method; the name of the person employing the method				
2.7 Where medicines have been acquired is there a record of:			VMD 19	
proof of purchase of the medicine concerned	Medium	Y	VMD 17	
name of the product	High	Υ		
batch number	High	Y		
the date of purchase	Medium	Y		
the quantity purchased	High	Y		
the name and address of the supplier	Medium	Y		
2.8 Where medicines have been disposed is there a record of:			VMD 19	
the date of disposal	Medium	N/A	1	Medicines are only supplied in the required quanitity to complete the course of treatment. As such, no surplus is available.
the quantity of product involved	Medium	N/A	]	If medicines were to be disposed of, procedures are in place for appropriate disposal through the company vet.
how and where it was disposed of	Medium	N/A		
2.9 Are veterinary health plans available which detail bio-security protocols, preventative measures and treatments in relation to sea lice?	Medium	Y	CoGP 4.3.129, 5.3.83	
Consider the following points over a percentage of treatments conducted on site				
2.10 Has the recommended course of treatments been completed?	Medium	Y	CoGP 4.3.134, 5.3.88	

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
2.11 If not, is there a recorded acceptable reason for not completing treatment?	Medium	N/A	CoGP 4.3.135, 5.3.89	All treatments, where conducted, have been completed as directed by the vet.
2.12 Was advice taken from the Veterinary surgeon in such circumstances?	Medium	N/A	CoGP 4.3.135, 5.3.89	
2.13 Are there clear written instructions regarding medicine use, available to those responsible for treatment administration?	Medium	Y	CoGP 4.3.133, 5.3.87	Instructions for administration were detailed on the prescriptions.
2.14 Does the site have treatment discharge consents relevant to sea		Y	Detail if necessary:	CAR licence.
lice?				
c. Inspection of records relating to farm management groups and	farm manager	ment agreements	s or statements	
3.1 Is there a nominated farmer acting as coordinator and point of contact for this farm or area inclusive of this farm?	Low	Y	SSI 1,5,b CoGP 4.3.75, 5.3.44	
3.2 Is there a written undertaking that the farm will observe the provisions of the NTS <sup>6</sup> ?	Low	Y	CoGP 4.3.76, 5.3.45	Detailed in the FMS.
3.3 Has an area group been formed within the area containing the site?	Medium	Y	CoGP 4.3.77, 5.3.46	One other site belonging to the same business falls within the area.
<ul> <li>3.4 Does the remit of the area group have appropriate veterinary involvement? Consider:</li> <li>-agreed basis for monitoring sea lice</li> <li>-coordinated monitoring and treatment</li> <li>-co-operation between participating farms</li> </ul>	Medium	Y	CoGP 4.3.77, 5.3.46 SSI 1,5, c	Company vet is available as required. VHWP and FMS consider the required points.
This may require follow up investigation conducted off site to determine			1	
3.5 Are records available of any decisions made by the FMG in relation to the prevention, control and reduction of parasites?	Low	Y	SSI 1, 5, c	End of cycle and beginning of cycle summaries available in the VHWP.
3.6 Where treatments have been administered is this done in accordance with principles to maximise the effectiveness of treatments, promote the minimal use of medicines consistent with the maintenance of high standards of fish welfare and help preserve their efficacy?	Medium	Y	4.3.82, 5.3.51	Treatments, where conducted, are scheduled to be synchronous. Weekly counts on both sites are completed and records are shared. Bio-assays can be completed to determine sensitivity.
For example, the principles of ISLM include: Resistance monitoring – reporting suspected adverse drug event (SADE) to the VMD.			1	
The steps to determine if resistance is considered a reason for a suspected lack of efficacy (e.g. Bio-assay tests and results, seeking veterinary advice)				
Appropriate discharge consent in place Use of authorized medicines with veterinary instruction and advice as necessary Monitoring lice numbers				
Using an array of treatments where possible Treating all stocks on site at the same time				

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
Avoiding the simultaneous use of different active ingredients				
Avoiding consecutive treatments of the same active ingredient, and				
certainly not on the same cohort of lice				
Routine removal of moribund fish and regular removal of mortalities.				
3.7 Are weekly monitoring results communicated to other farmers within the defined area?	High	Ŷ	CoGP 4.3.78, 5.3.47	Both sites within the area belong to the same business so results are
3.8 Is this done 'as soon as reasonably possible where lice numbers	Lliab	V	CoGP 4.3.79, 5.3.48	readily accessible.
exceed the suggested criteria for treatment?	High	ř	COGP 4.3.79, 5.3.46	
3.9 Is sea lice data and other information relevant to the management	Low	V	CoGP 4.3.80, 5.3.49	As required.
of sea lice provided to the SSPO?	LOW	1	0001 4.3.00, 3.3.43	As required.
3.10 Are annual review meetings held by FMA groups to evaluate site	High	Y	CoGP 4.3.83, 5.3.52	
performance against set criteria?				
3.11 Is there a signed documented farm management agreement or		Y	AFSA <sup>13</sup> 4A	
farm management statement relevant to the site and CoGP Farm				
Management Area (or equivalent)?			Detail if necessary:	
3.12 Are up to date copies of FMS available from other APB operating	Medium	N/A	CoGP 4.3.88, 5.3.57	
within the same FMA?				
3.13 Are significant changes to FMS notified to other companies	Medium	N/A	CoGP 4.3.89, 5.3.58	
within the FMA?				
3.14 Is there co-operation between APB's operating within the FMA in	Medium	N/A	CoGP 4.3.90, 5.3.59	
the development and implementation of FMAg?			1501 (5	
3.15 Are copies of FMS or FMAg available for inspection?	Medium	Y	AFSA 4B	
3.16 Does the FMS or FMAg take into account the relevant aspects	Medium	Y	CoGP 4.3.91, 5.3.60	
regarding a sea lice control strategy? 3.17 If the FMA has been redefined , is there documented evidence		N/A	CoGP 4.3.92, 5.3.61	
to demonstrate that the risks to health within and outwith the area is	High <sup>10</sup>	N/A	COGP 4.3.92, 5.3.01	
not increased by the proposal?				
3.18 Is the CoGP Farm Management Area (or equivalent) fallowed	High	Y	CoGP 4.3.100	
synchronously on a single year class basis?	g			
3.19 If answered no to 3.18, then is there a documented risk	High	N/A	CoGP 4.3.101	
assessment which meets the requirements of CoGP point 4.3.101?	Ŭ			
d. Inspection of records relating to training and procedures				
4.1 Is there a training programme or plan in place relevant to sea lice	High	Y	CoGP 7.1.8	
control for the site?				
4.2 Are training records available for relevant staff in relation to:			CoGP 4.1.6, 5.1.6	
			SSI, 1,1	
parasite identification	High	Y	CoGP 4.3.84-86,	
counting parasites (procedures for)	High	Y	5.3.53-55	
recording counts	High	Y		

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
biology and life cycle of parasites	Low	Y		
symptoms of parasite infection in fish	Low	Y		
4.3 Have staff been trained in the administration of treatments?	High	Y	CoGP 4.1.6, 5.1.6 CoGP 4.3.84, 5.3.53	
N.B. there is no legal requirement to maintain a record of this			1	
Where records exist regarding SOPs and site procedures these should be inspected to confirm suitability				
e. Inspection of site and site stock				
5.1 Are medicines used, stored and disposed of safely?	Medium	Y	VMD schedule 5	Any medicines that are held on site are stored in a lockable chemical cabinet on the site barge.
5.2 Do the sea lice levels observed on stocks reflect sea lice count data?	High	Υ	1	
Refer to section e) of guidance notes			1	
5.3 Does the site appear satisfactory in terms of fish welfare relating to sea lice infestation?	High	Y	1	
f. Inspection of farm count procedures				
6.1 Are pens and fish sampled at random?	Low	Y	CoGP Annex 6,	
6.2 Have the personnel conducting counts had appropriate training in lice recognition and recording?	High	Y	4.3.84-86, 5.3.53-55	Sealice training has been completed by both members who were observed conducting the sealice count during the inspection. Training records inspected.
(Cross reference to training records – Section d)				
6.3 Can such personnel demonstrate post training competence?	High	Y	CoGP 4.3.85, 5.3.54	Accurate identification of species and lifestage was observed during
6.4 Do the sample sizes and methods of sampling match the CoGP suggested protocol (detailed iii – vii)?	Medium	Y	Annex 6	the inspection Five cages were sampled at random and five fish were selected from each. After each cage, any sealice that remained in the tub of
35 I ( )				anaesthetic were also counted and recorded.
N.B. Other strategies are acceptable if considered adequate in the control and reduction of sea lice			1	
6.5 Is identification and recording of sea lice count information including species and stages observed to be correct?	High	Y	Annex 6	
Minimum recording requirements within the CoGP and NTS are:			1	
for Caligus elongatus all identifiable stages and for Lepeophtheirus salmonis chalimus, mobiles and adult females (with or without egg strings) <sup>11</sup>				
<b>C</b> ,	Medium	Y		Field records are transferred daily and were available for insepction.
g. Inspection of treatment administration procedures		-	-	
7.1 Are treatments considered to be administered in an appropriate competent manner?	High	Y		Manufacturers instructions were followed and correct dosage was used for the volume of water.

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
Consider appropriate use of tarpaulins; completion of medication per prescription, correct concentrations, mixing and administrations, appropriate product used				
7.2 Is accurate information provided to the attending veterinary surgeon for dosage calculation?	High	N/A		A vet was not on site on the day of inspection. Site staff were observed administering the anaesthetic, following manufactureres instructions.
7.3 Are the fish under consideration being given any other medication, or are they in a withdrawal period for any other medication?		Y		Fish were in withdrawel for SLICE on the day of inspection.
7.4 If so, has the prescribing veterinary surgeon been informed of this?	Medium	N/A	CoGP 4.3.132, 5.3.86	
7.5 Are clear instructions for medication, dosage and administration communicated to the staff responsible for treatment?	High	Y	CoGP 4.3.133, 5.3.87	

Additional actions	Powers	Comments and advice given or action taken if necessary
If necessary conduct a sea lice count in accordance with the protocol of the CoGP. Indicate where this procedure has been done and make	Power granted under the Act – section 3 (2) (a)	
a record of results within the comments box i. Collection of samples	Power granted	
If necessary collect samples. Indicate if samples have been taken and detail what those samples are and the purpose of their collection	under the Act	
j. Enforcement Notice. If an enforcement notice has been issued then maintain a copy / duplicate and record detail	Power granted under the Act – Section 6 (2)	
Guidance on completing the Enforcement Notice

# ENHANCED SEA LICE INSPECTION

An enhanced sea lice inspection to ascertain the levels of sea lice and for assessing the measures in place for the prevention, control and reduction of sea lice was conducted in accordance with the Aquaculture and Fisheries (Scotland) Act 2007.

The visit consisted of an inspection of records with regards to sea lice, the stock on site, site procedures with regards to sea lice and the provision of advice.

#### a) Inspection of sea lice records

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

#### b) Inspection of records relating to treatment and control of sea lice

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

# c) Inspection of records relating to farm management groups and area management agreements.

The site meets the requirement of current Scottish industry best practice. No recommendations made and no further action is required.

#### d) Inspection of records relating to training and procedures

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

#### e) Inspection of site and site stock

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

#### f) Inspection of farm count procedures

An inspection of site staff conducting and recording a sea lice count was carried out. This met the requirements of The Fish Farming Business (Record Keeping) (Scotland) Order 2008 and CoGP. No further recommendations or further action required.

R10

# g) Inspection of treatment administration procedures

An inspection of treatment administration procedures was carried out. The site meets the requirement of current Scottish industry best practice. No further recommendations made, or further action required.

### Further Action

The site meets the requirement of current Scottish industry best practice. No further recommendations are made, or further action required.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

**DATE OF VISIT** 26/03/2024 Tanera

#### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

Mortality levels had exceeded the reporting criteria since the last inspection and had been reported to the Fish Health Inspectorate as required.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

#### Inspection under the Animals and Animal Products (Examination for Residues and Maximum **Residue Limits) (England and Scotland) Regulations 2015**

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

# Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to fish farm management agreements and statements and containment and escapes.

An enhanced sea lice inspection was conducted. A separate report will be issued in due course.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
