Time spent on site:	hr	\neg	Main Inspecto	or:		
Site No: FS0865 Business No: FB0119	Site Name: Business Name:	Marulaig Bay Mowi Scotland L	td			
Case Types: 1 REG 2	3	4	5	6		
Water Temp (°C):	Thermometer No:			FHI 045 complet	ed	
Observations:	Region: WI	Water type:	S	CoGP MA:	W-20	
Dead/weak/abnormally behaving fish present? Clinical signs of disease observed? Gross pathology observed? N/A If yes, see additional information/clinical score sheet. N/A If yes, see additional information/clinical score sheet. N/A If yes, see additional information/clinical score sheet.						
Diagnostic samples taken?		Ш				
UNI/REG only - if unable to carry	out intended visit deta	il reason below:				
	Weather	did not permit site visi	t			

Additional Case Information:

Stock origin: Glenfinnan (Aquagen), Loch ness (Stofinfiskur)

Lumpfish - first batch came with lorry on 26/11/2023; second batch arrived with wellboat in wk 6 2024 (w/b 05/02/2024).All lumpfish stock from Ocean Matters. Only one movement occurred since last inspection.

Hydrogen peroxide treatments 2024:

04/01 to 08/01

06/02 to 16/02 (all pens)

Pen 11 and 12 treated twice

FW treatments - conducted for 6/7hrs

Lumpfish mortality- last 4 weeks

wk10, 2414, 4.98%, wounds & fin damage; Wk9, 1721, 3.43%, wounds & fin damage; Wk8, 523, 1.03%, wounds & fin damage; Wk7, 119, 0.23%, wounds & fin damage. Wound and fin damage attributed to transport and handling.

Lumpfish mortality - other peaks

 2023 wk51
 24,276
 40.04% (emaciation)

 2023 wk52
 15,971
 43.93% (emaciation)

 2024 wk1
 10,343
 50.73% (emaciation)

 2024 wk2
 8,663
 86.25% (emaciation)

 2024 wk3
 584
 42.29% (emaciation)

Emaciation as a result of fish deployed at unsuitable weight for site. Note has been made by health manager that fish need to be over 40g in the future.

Health team out every two weeks; last health report 12/02/2024. AGD identified as an issue on site since 2023, with pen 12 being worst affected.

Paperwork inspected remotely on 13/03/2024.

Weather did not permit to conduct site inspection on 20/03/2024

Sea Lice Inspection (Seawater Sites Only)

- 1. Has the site experienced sea lice problems in the previous 4 years?
- 2. Is the CoGP Farm Management Area (or equivalent) fallowed synchronously on a single year class basis?
- 3. Does the site have access to a range of licenced in-feed and bath sea lice medications (including deltamethrin, azamethiphos an benzoate) as well as access to suitable biological and/or mechanical control measures, and can these be deployed in a reasonable time?
- 4. Is there a signed documented farm management agreement or statement relevant to the site and CoGP Farm Management Area equivalent)?
- 5. Are sea lice count records available for inspection? (Legal SSI, CoGP Annex 6)
- 6. Do records adequately reflect the required standard specified in the SSI and the CoGP? (Legal SSI, CoGP Annex 6)
- 7. Are sea lice (*L. salmonis*) record levels below the suggested criteria for treatment in the CoGP during the period that records are (CoGP Annex 6)
- 8. Have average adult female sea lice (*L. salmonis*) numbers per fish been at a level of 3 or above (prior to w/b 10/6/19) or 2 or about 10/6/19) during the period that records are inspected?

If yes, have these been reported to the Fish Health Inspectorate? If no, FHI see comment.

- 9. Is C. elongatus infestation at a level which is considered to cause significant welfare problems? (CoGP 4.3.81, 5.3.50)
- 10. Have therapeutic treatments been administered or other actions taken when *L. salmonis levels* have exceeded the suggested of treatment or where *C. elongatus* is considered to have welfare implications? (CoGP 4.3.82, 5.3.51)
- 11. Has any other action been taken (where applicable)?
- 12. Have therapeutic treatments or the actions taken had a significant impact upon the lice levels recorded?
- 13. Are treatments, where conducted, carried out in cooperation between participating farms?
- 14. Is there a harvesting strategy for the site, where fewer populations or part populations are held without treatment for sea lice?
- 15. Is there a site specific written lice management procedure with waypoints describing set actions to deal with recognised scenari escalation of a sea lice infestation?
- 16. Do the sea lice levels observed on stocks reflect sea lice count data? If no please detail reasons.

Containment Inspection

- 1. Has the site experienced equipment damage due to predators in the current or previous production cycles?
- 2. Are measures in place to mitigate against the predation experienced on site? (Detail below)

Tensioned nets, bird nets, twined to the hand rail with creel clips, HDPE (Seal pro) nets

If other, detail below:

- 3. Have escape incidents or events been experienced on or in the vicinity of the site since the last FHI inspection?
- If Yes proceed with questions 4 9. If No skip to question 10
- 4. Have these been reported to Scottish Ministers?
- 5. Have these been reported to local DSFB forthwith (where they exist)? (CoGP 4.4.37, 5.4.17)
- 6. Have these been reported to the SSPO and local fisheries trusts forthwith (where they exist)? (CoGP 4.4.37, 5.4.17)
- 7. Were methods (if any) used to recover escapees? If yes give detail
- 8. If gill nets were deployed was this action agreed with local wild fish interests and was permission given by Scottish Ministers? (Le 4.4.38, 5.4.18)
- 9. What action was taken to prevent and minimise the risk of further escapes? (Not covered in code but could

be considered under satisfactory measures of the Act)

10. Is the site inspected as satisfactory with regards to containment? If no, please detail reason(s)

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

Business NoFB0119Date of Visit13/03/2024Site NoFS0865Site NameMarulaig BayCase No20240076Inspector

On this occasion the site could not be inspected due to adverse weather conditions not permitting the site to be visited. An inspection will be rescheduled at a later date.

Records

The surveillance frequency category of the site was assessed as medium. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every second year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Mortality records were inspected and found to be adequately maintained.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site records were also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to fish farm management agreements and statements.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)
