

Case No: 2024-0139 Date of visit: 22/05/2024

Time spent on site: 8 hours Main Inspector: [Redacted]

Site No: FS1290 Site Name: Shuna SW (Rubh'an Trilleachain)
Business No: FB0134 Business Name: Kames Fish Farming Ltd

Case Types: 1 SLA 2 ECI 3 VMD 4 CNI 5 6

Water Temp (°C): 10.5 Thermometer No: T172 FHI 045 completed

Observations: Region: ST Water type: S CoGP MA: M-40

Dead/weak/abnormally behaving fish present? N If yes, see additional information/clinical score sheet.
Clinical signs of disease observed? N If yes, see additional information/clinical score sheet.
Gross pathology observed? N If yes, see additional information/clinical score sheet.
Diagnostic samples taken? N

UNI/REG only - if unable to carry out intended visit detail reason below:
[Redacted]

**Additional Case Information:**

WRS and LUM all farmed from Mowi owned farms

Cleaner fish treated with florfenicol in feed treatment since date of input (food from World of Feeds)

Moritella detected on site using PCR with high CT-values. Reportedly no clinical signs of the disease. No clinical signs of disease observed during inspection of the stock.

Pseudomonas anguilliseptica detected in lumpfish population via PCR with low CT-values. Higher than average lumpfish mortality has been attributed to this pathogen.

Fish caught for VMD samples appeared healthy externally and internally.

Case No: **2024-0139** Site No: **FS1290**  
 Date of Visit: **22/05/2024** Inspector(s): **[REDACTED]**

**Registration/Authorisation Details**

1. Business/site details summary checked by site representative? **Y**  
 2. Changes made to details? **Y**

**Site Details (include cleaner fish for all sections)**

Total No facilities	<b>12</b>	Facilities stocked	<b>12</b>	No facilities inspected	<b>12</b>
Species	<b>SAL</b>	<b>WRS</b>	<b>LUM</b>		
Age group	<b>24 Q2</b>	<b>2023</b>	<b>2024</b>		
No Fish	<b>754,741</b>	<b>18,147</b>	<b>83,211</b>		
Mean Fish Wt	<b>402g</b>	<b>220g</b>	<b>28g</b>		
Next Fallow Date (Site)	<b>Aug 2025</b>		Next Input Date (Site)	<b>April 2027</b>	
Recent (last 4 wks) disease problems?			<b>Y</b> Any escapes (since last visit)?		
If yes, detail:	<b>Increased mortality in LUM population, see additional information</b>				

**Movement Records**

1. Movement records available for inspection? **Y**  
 2. Date of last inspection: **27/05/2021**  
 3. Are records complete and correctly entered? **Y**  
 4. Are movement records available for dead fish and waste? **Y**  
 5. Are records complete and correctly entered? **Y**  
 6. Are health certificates for introductions (outwith GB) available? **N/A**

**Transport Records**

1. Are any movements carried out by (or on behalf) of the business (not using a STB)? **N**  
 If yes, is there a system in place for maintenance of transportation records? **[REDACTED]**

**Mortality Records**

1. Mortality records available for inspection? **Y**  
 2. How are mortalities disposed of? **Other (detail)**  
 If other detail: **Fish taken to Kames Pier whole aboard a boat and ensiled on shore at Kames Pier. This is recorded**  
 3. Mortality records complete and correctly entered? **Y**  
 4. Recent mortality (last 4 wks): **SAL - wk 20: 144 fish (0.02%), wk 19: 325 fish (0.04%), wk 18: 351 fish (0.05%), wk 17: 532 (0.07%). LUM - wk 20: 774 fish (0.9%), wk 19: 2,241 fish (2.54%), wk 18: 3,178 fish (3.47%), wk 17: 3,657 fish (3.84%). WRS - wk 20: 1,627 fish (8.27%) no cleaner fish on site before wk 20.**  
 5. Evidence of recent increased/atypical mortalities? **Y**  
 If yes, facility nos/no mortality per facility/no stock per facility/reason:  
**LUM mortality higher than expected. This has been attributed to Pseudomonas anguilliseptica (detected by 3rd party vet PCR test). Mortality elevated in all pens on site and has been ongoing since input of LUM.**  
 6. Any other peaks in mortality during period checked? **N**  
 If yes, detail: **[REDACTED]**  
 7. Have increased (unexplained) mortalities been reported to vet or FHI? **N/A**  
 If yes, detail action: **Reported by a veterinary company. Not required to notify FHI**  
 8. Have 'mortality events' been reported to FHI? If no, enter details on mortality events sheet. **N/A**

**Treatments and Medicines Records**

1. Recent treatments (see comment)?	<input type="checkbox"/>	Y
If yes, detail: TMS, SLICE, Florfenicol		
If other, detail:		
2. Medicines records available for inspection?	<input type="checkbox"/>	Y
3. Are records complete and correctly entered?	<input type="checkbox"/>	Y
4. Are fish in a withdrawal period?	<input type="checkbox"/>	Y
5. If yes, what treatment(s)?	Florfenicol (wrasse and lumpfish only)	
If other, detail:		
6. Are medicines stored appropriately?	<input type="checkbox"/>	Y

**Biosecurity Records**

1. Biosecurity records available for inspection?	<input type="checkbox"/>	Y
2. Has the manner and frequency of mortality removal, recording and safe disposal been considered?	<input type="checkbox"/>	Y
3. Has the manner and period in which the APB will notify Scottish Ministers or veterinary professional of any <i>increased (unexplained)</i> mortality at the site been included?	<input type="checkbox"/>	Y
4. Has the action that will be taken in the event that the presence or suspicion of the presence of a listed disease is detected been included and <i>how</i> and <i>when</i> that will be notified to Scottish Ministers?	<input type="checkbox"/>	Y
5. Has the health status of aquaculture animals being stocked on the farm site been covered (equal or higher health status, certification if required)?	<input type="checkbox"/>	Y
6. Have the husbandry and biosecurity measures implemented between each epidemiological unit to minimise transmission of disease been covered (movement of staff, visitors, equipment, live or dead fish etc.)?	<input type="checkbox"/>	Y
7. Is documentation available regarding the measures in place to maintain the physical containment of aquaculture animals held on site?	<input type="checkbox"/>	Y
8. Have the biosecurity procedures been adequately implemented on site?	<input type="checkbox"/>	Y
If no, detail:		

**Results of Surveillance**

1. Has any animal health surveillance been carried out by, or on behalf of, the business?	<input type="checkbox"/>	Y
2. If yes, are results available for inspection?	<input type="checkbox"/>	Y
3. Any significant results?	<input type="checkbox"/>	Y
If yes, detail (if not detailed under recent disease problems).		See additional info

Case No: 2024-0139

Site No: FS1290

**Sea Lice Inspection (Seawater Sites Only)**

1. Has the site experienced sea lice problems in the previous 4 years?
2. Is the CoGP Farm Management Area (or equivalent) followed synchronously on a single year class basis?
3. Does the site have access to a range of licenced in-feed and bath sea lice medications (including deltamethrin, azamethiphos and emamectin benzoate) as well as access to suitable biological and/or mechanical control measures, and can these be deployed in a reasonable period of time?
4. Is there a signed documented farm management agreement or statement relevant to the site and CoGP Farm Management Area (or equivalent)?
5. Are sea lice count records available for inspection? (Legal SSI, CoGP Annex 6)
6. Do records adequately reflect the required standard specified in the SSI and the CoGP? (Legal SSI, CoGP Annex 6)
7. Are sea lice (*L. salmonis*) record levels below the suggested criteria for treatment in the CoGP during the period that records are inspected? (CoGP Annex 6)
8. Have average adult female sea lice (*L. salmonis*) numbers per fish been at a level of 3 or above (prior to w/b 10/6/19) or 2 or above (from w/b 10/6/19) during the period that records are inspected?  
If yes, have these been reported to the Fish Health Inspectorate? If no, FHI see comment.
9. Is *C. elongatus* infestation at a level which is considered to cause significant welfare problems? (CoGP 4.3.81, 5.3.50)
10. Have therapeutic treatments been administered or other actions taken when *L. salmonis* levels have exceeded the suggested criteria for treatment or where *C. elongatus* is considered to have welfare implications? (CoGP 4.3.82, 5.3.51)
11. Has any other action been taken (where applicable)?
12. Have therapeutic treatments or the actions taken had a significant impact upon the lice levels recorded?
13. Are treatments, where conducted, carried out in cooperation between participating farms?
14. Is there a harvesting strategy for the site, where fewer populations or part populations are held without treatment for sea lice?
15. Is there a site specific written lice management procedure with waypoints describing set actions to deal with recognised scenarios during the escalation of a sea lice infestation?
16. Do the sea lice levels observed on stocks reflect sea lice count data? If no please detail reasons.

**Containment Inspection**

1. Has the site experienced equipment damage due to predators in the current or previous production cycles?  N
2. Are measures in place to mitigate against the predation experienced on site? (Detail below)  Y

Tensioned nets, bird nets, contract with pest control company for shorebase  
If other, detail below:

3. Have escape incidents or events been experienced on or in the vicinity of the site since the last FHI inspection?  N  
If Yes proceed with questions 4 – 9. If No skip to question 10
4. Have these been reported to Scottish Ministers?
5. Have these been reported to local DSFB forthwith (where they exist)? (CoGP – 4.4.37, 5.4.17)
6. Have these been reported to the SSPO and local fisheries trusts forthwith (where they exist)? (CoGP – 4.4.37, 5.4.17)
7. Were methods (if any) used to recover escapees? If yes give detail
8. If gill nets were deployed was this action agreed with local wild fish interests and was permission given by Scottish Ministers? (Legal, CoGP – 4.4.38, 5.4.18)
9. What action was taken to prevent and minimise the risk of further escapes? (Not covered in code but could be considered under satisfactory measures of the Act)
10. Is the site inspected as satisfactory with regards to containment? If no, please detail reason(s)  Y

Case No: 2024-0139

Site No: FS1290

Date of Visit: 22/05/2024

Inspector: [REDACTED]

**Point of Compliance**

1. Is the farm under inspection located within a farm management area?

If N, no further questions require completion.

**Points of Compliance for Both Farm Management Agreements and Statements**

2. Has a current farm management agreement or statement (FMAg/S) been prepared?

3. Is the current FMAg/S available for inspection?

4. Does the FMAg/S identify the relevant farm management area?

5. Does the FMAg/S identify the fish farm site(s) to which it applies?

6. Does the FMAg/S identify the date of commencement of the agreement or statement?

7. Does the FMAg/S identify the date of review?

**Arrangements for Fish Health Management**

8. Does the FMAg/S identify the minimum health standards for the stocks to be introduced to the area or farm?

9. Does the FMAg/S identify the vaccination requirements for stocks held in the area or farm?

10. Does the FMAg/S identify the species of fish which may be stocked into the area or farm?

11. Does the FMAg/S identify the maximum stocking density of any pen on any farm in the area or the individual farm?

12. Does the FMAg/S identify the arrangements for the storage and disposal of any dead fish from any fish farm in the area or the individual farm?

**Arrangements for The Management of Sea Lice**

13. Does the FMAg/S identify arrangements for the sharing of data on sea lice numbers and treatments?

14. Does the FMAg/S identify the availability and the use of medicines on farms covered by the agreement of statement?

15. Does the FMAg/S identify any requirements for the sensitivity testing of available treatments for sea lice on farms in the area or individual farms?

16. Does the FMAg/S identify the circumstances under which biological controls and cleaner fish are to be used on farms in the area or individual farms?

17. Does the FMAg/S identify the arrangements for synchronous treatments on farms within the area?

**Live Fish Movements**

18. Does the FMAg/S identify the circumstances when live fish may be introduced or removed from the area or farm?

19. Does the FMAg/S identify the arrangements for the movement of live fish on and off sites in the area or individual farms?

**Harvesting**

20. Does the FMAg/S identify acceptable harvest practices on farms in the area or individual farms?

**Fallowing**

21. Does the FMAg/S identify the dates by which the area or individual farm will be fallow and the earliest date when a farm or area may be restocked?

22. Does the FMAg/S identify whether one or more year classes may be stocked onto sites covered by the agreement or statement?

23. Does the FMAg/S identify whether broodstock or potential broodstock are to be kept on any site covered by the agreement or statement?

**Point of Compliance for Farm Management Agreements Only**

24. Does the farm management agreement include arrangements for persons to become, or cease to be, parties to the agreement?

**Management and operation**

25. Is the fish farm being managed and operated in accordance with the agreement or statement?

26. What is the version no/date of issue of the FMAg/S?

Case No:  Site No:

Date of visit:  Inspector(s):

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
-------------------------	------------	---------------	-------------	--

**ENHANCED SEA LICE INSPECTION CHECKLIST**

**a. Inspection of sea lice records**

1.1 Are sea lice count records available for inspection?	Medium	Y	CoGP 1.2.1, 1.2.2, Annex 6	Only weeks when counts were not conducted were during a fallow period.
1.2 Do records adequately reflect the required standard specified in the SSI <sup>1</sup> and the CoGP <sup>2</sup> ? (Counts should be weekly, record the person making the count, date of the count, number of fish sampled (should be 25), pen or facility number recorded, water temperature <sup>3</sup> , number of parasites observed and correct stages recorded <sup>4</sup> )	Low & Medium	Y	SSI 1,2,	
1.3 Where weekly counts are not conducted is the reason for not conducting the count stated?	Low	N/A	SSI 1,2(g)	
1.4 Is that reason considered acceptable by the Inspector? Give detail.	Low	N/A		
1.5 Has the site experienced sea lice problems in the previous 4 years?		N	Detail if necessary:	

**b. Inspection of records relating to treatment and control of sea lice**

2.1 Has appropriate action been taken where: a) <i>L. salmonis</i> record levels have been above the suggested criteria for treatment? b) <i>C. elongatus</i> infestation is at a level considered to cause significant welfare problems	High	Y	CoGP Annex 6	In the last 2 cycles of fish the lice levels have been above the suggested criteria for treatment twice, once in Feb 2023 and in the next cycle of fish in April 2023. The lice levels were treated with salmosan on board a well boat during the move from Shuna (SW) to Carradale (aka Eilean Grianain) in Feb 2023. This treatment was attributed to Carradale in the treatment record. In April 2023 fish had a thermo licer treatment and lice levels dropped below the suggested criteria for treatment during the week of the treatment.
2.2 Is therapeutic treatment initiated ASAP where required?	High	N/A	CoGP 4.3.81, 5.3.50	
	Medium	Y	CoGP 4.3.130, 5.3.84	
2.3 Where medicines have been administered there should be a record of: the name / identity of the product the date of administration the quantity (concentration and amount) administered the method of administration of the product the identification of the fish / facilities treated name of the person administering the treatment the withdrawal period	High High High High High Low Medium	Y Y Y Y Y Y Y	VMD <sup>12</sup> 19 SSI 1,3	Records for Feb 2023 treatment observed.
2.4 If the medicine is administered by a veterinary surgeon:			VMD 18	

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
the name of the veterinary surgeon	High	N/A		Previous lice treatments have not been administered by a vet. Prescriptions applied for by vet. Last salmosan treatment reportedly carried out by wellboat captain and site managers from Carradale and Shuna SW
name of the product	High	N/A		
batch number	High	N/A		
the date of administration	High	N/A		
amount administered	High	N/A		
identification of fish treated	High	N/A		
withdrawal period	Medium	N/A		
2.5 Have therapeutic treatments or the actions taken had a significant impact upon the lice levels recorded?	High	Y		Thermolicer treatment (April 2023) reduced levels of adult females to over 50%
Inspect records to confirm. Significant impact - ≥50% reduction in site average <i>L.salmonis</i> numbers (all stages)				
2.6 If other methods are employed on site to control sea lice and their impact is there a record of:	Low	Y	SSI, 1,4	Lumpfish and wrasse used to reduce lice levels. Thermolicer also available.
the nature and date of the method employed; the identification number of all facilities subjected to the method; the name of the person employing the method				
2.7 Where medicines have been acquired is there a record of:				
proof of purchase of the medicine concerned	Medium	Y	VMD 19	
name of the product	High	Y	VMD 17	
batch number	High	Y		
the date of purchase	Medium	Y		
the quantity purchased	High	Y		
the name and address of the supplier	Medium	Y		
2.8 Where medicines have been disposed is there a record of:				
the date of disposal	Medium	N/A	VMD 19	Never disposed of unsued medicine. Exact amount ordered for each treatment.
the quantity of product involved	Medium	N/A		
how and where it was disposed of	Medium	N/A		
2.9 Are veterinary health plans available which detail bio-security protocols, preventative measures and treatments in relation to sea lice?	Medium	Y	CoGP 4.3.129, 5.3.83	Mowi sea lice policy 2024 observed during inspection. Details also observed in FMS and FMAg regarding treatment and control of sea lice.
Consider the following points over a percentage of treatments conducted on site				
2.10 Has the recommended course of treatments been completed?	Medium	Y	CoGP 4.3.134, 5.3.88	
2.11 If not, is there a recorded acceptable reason for not completing treatment?	Medium	N/A	CoGP 4.3.135, 5.3.89	
2.12 Was advice taken from the Veterinary surgeon in such circumstances?	Medium	N/A	CoGP 4.3.135, 5.3.89	
2.13 Are there clear written instructions regarding medicine use, available to those responsible for treatment administration?	Medium	Y	CoGP 4.3.133, 5.3.87	

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
2.14 Does the site have treatment discharge consents relevant to sea lice?		Y	Detail if necessary:	
<b>c. Inspection of records relating to farm management groups and farm management agreements or statements</b>				
3.1 Is there a nominated farmer acting as coordinator and point of contact for this farm or area inclusive of this farm?	Low	Y	SSI 1,5,b CoGP 4.3.75, 5.3.44	
3.2 Is there a written undertaking that the farm will observe the provisions of the NTS <sup>6</sup> ?	Low	Y	CoGP 4.3.76, 5.3.45	
3.3 Has an area group been formed within the area containing the site?	Medium	Y	CoGP 4.3.77, 5.3.46	
3.4 Does the remit of the area group have appropriate veterinary involvement? Consider: -agreed basis for monitoring sea lice -coordinated monitoring and treatment -co-operation between participating farms This may require follow up investigation conducted off site to determine	Medium	Y	CoGP 4.3.77, 5.3.46 SSI 1,5, c	
3.5 Are records available of any decisions made by the FMG in relation to the prevention, control and reduction of parasites?	Low	Y	SSI 1, 5, c	
3.6 Where treatments have been administered is this done in accordance with principles to maximise the effectiveness of treatments, promote the minimal use of medicines consistent with the maintenance of high standards of fish welfare and help preserve their efficacy? For example, the principles of ISLM include: Resistance monitoring – reporting suspected adverse drug event (SADE) to the VMD. The steps to determine if resistance is considered a reason for a suspected lack of efficacy (e.g. Bio-assay tests and results, seeking veterinary advice) Appropriate discharge consent in place Use of authorized medicines with veterinary instruction and advice as necessary Monitoring lice numbers Using an array of treatments where possible Treating all stocks on site at the same time Avoiding the simultaneous use of different active ingredients Avoiding consecutive treatments of the same active ingredient, and certainly not on the same cohort of lice Routine removal of moribund fish and regular removal of mortalities.	Medium	Y	4.3.82, 5.3.51	
3.7 Are weekly monitoring results communicated to other farmers within the defined area?	High	Y	CoGP 4.3.78, 5.3.47	
3.8 Is this done 'as soon as reasonably possible where lice numbers exceed the suggested criteria for treatment?	High	Y	CoGP 4.3.79, 5.3.48	
3.9 Is sea lice data and other information relevant to the management of sea lice provided to the SSPO?	Low	Y	CoGP 4.3.80, 5.3.49	

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary	
3.10 Are annual review meetings held by FMA groups to evaluate site performance against set criteria?	High	Y	CoGP 4.3.83, 5.3.52	Quarterly meetings scheduled and attended by all members of the FMA. More frequent informal meetings taking place in between formal recorded meetings	
3.11 Is there a signed documented farm management agreement or farm management statement relevant to the site and CoGP Farm Management Area (or equivalent)?	Medium	Y	AFSA <sup>13</sup> 4A	Area split in two. SOP 4 observed since the date of the inspection to ensure compliance with this point (observed 28/06/2024)	
3.12 Are up to date copies of FMS available from other APB operating within the same FMA?		Y	Detail if necessary: CoGP 4.3.88, 5.3.57		
3.13 Are significant changes to FMS notified to other companies within the FMA?		Y	CoGP 4.3.89, 5.3.58		
3.14 Is there co-operation between APB's operating within the FMA in the development and implementation of FMAg?		Y	CoGP 4.3.90, 5.3.59		
3.15 Are copies of FMS or FMAg available for inspection?		Y	AFSA 4B		
3.16 Does the FMS or FMAg take into account the relevant aspects regarding a sea lice control strategy?		Y	CoGP 4.3.91, 5.3.60		
3.17 If the FMA has been redefined, is there documented evidence to demonstrate that the risks to health within and outwith the area is not increased by the proposal?		High <sup>10</sup>	Y		CoGP 4.3.92, 5.3.61
3.18 Is the CoGP Farm Management Area (or equivalent) followed synchronously on a single year class basis?		High	N		CoGP 4.3.100
3.19 If answered no to 3.18, then is there a documented risk assessment which meets the requirements of CoGP point 4.3.101?		High	Y		CoGP 4.3.101
<b>d. Inspection of records relating to training and procedures</b>					
4.1 Is there a training programme or plan in place relevant to sea lice control for the site?	High	Y	CoGP 7.1.8	Mowi Academy portal set-up for all new and existing members of staff. Sea lice training section observed during inspection.	
4.2 Are training records available for relevant staff in relation to:	High		CoGP 4.1.6, 5.1.6		
parasite identification		Y	SSI, 1,1		
counting parasites (procedures for)		Y	CoGP 4.3.84-86,		
recording counts		Y	5.3.53-55		
biology and life cycle of parasites		Y			
symptoms of parasite infection in fish		Y			
4.3 Have staff been trained in the administration of treatments?	High	Y	CoGP 4.1.6, 5.1.6 CoGP 4.3.84, 5.3.53	No training record observed whilst on site. No treatments using therapeutant methods have been carried out by staff since the date of the last inspection. Treatments (salmosan) have been carried out on board a well boat, but this treatment was attributed to the destination site (Carradale) in the records. Since the inspection a training record has been observed and the content of the course confirmed by the training provider (received 12/07/2024)	
N.B. there is no legal requirement to maintain a record of this					
Where records exist regarding SOPs and site procedures these should be inspected to confirm suitability					
<b>e. Inspection of site and site stock</b>					
5.1 Are medicines used, stored and disposed of safely?	Medium	Y	VMD schedule 5		

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
5.2 Do the sea lice levels observed on stocks reflect sea lice count data? Refer to section e) of guidance notes	High	Y		
5.3 Does the site appear satisfactory in terms of fish welfare relating to sea lice infestation?	High	Y		
<b>f. Inspection of farm count procedures</b>				
6.1 Are pens and fish sampled at random?	Low	Y	CoGP Annex 6,	Site staff were observed conducting a sea lice count on 20 fish from cage 3. Counting and recording both appeared accurate.
6.2 Have the personnel conducting counts had appropriate training in lice recognition and recording? (Cross reference to training records – Section d)	High	Y	4.3.84-86, 5.3.53-55	
6.3 Can such personnel demonstrate post training competence?	High	Y	CoGP 4.3.85, 5.3.54	
6.4 Do the sample sizes and methods of sampling match the CoGP suggested protocol (detailed iii – vii)? N.B. Other strategies are acceptable if considered adequate in the control and reduction of sea lice	Medium	Y	Annex 6	
6.5 Is identification and recording of sea lice count information including species and stages observed to be correct? Minimum recording requirements within the CoGP and NTS are: for Caligus elongatus all identifiable stages and for Lepeophtheirus salmonis chalimus, mobiles and adult females (with or without egg strings) <sup>11</sup>	High	Y	Annex 6	
6.6 Is the transfer of data from field counts to records observed to be satisfactory?	Medium	Y		
<b>g. Inspection of treatment administration procedures</b>				
7.1 Are treatments considered to be administered in an appropriate competent manner? Consider appropriate use of tarpaulins; completion of medication per prescription, correct concentrations, mixing and administrations, appropriate product used	High	N/A		
7.2 Is accurate information provided to the attending veterinary surgeon for dosage calculation?	High	N/A	CoGP 4.3.131, 5.3.85	
7.3 Are the fish under consideration being given any other medication, or are they in a withdrawal period for any other medication?		N/A		
7.4 If so, has the prescribing veterinary surgeon been informed of this?	Medium	N/A	CoGP 4.3.132, 5.3.86	
7.5 Are clear instructions for medication, dosage and administration communicated to the staff responsible for treatment?	High	N/A	CoGP 4.3.133, 5.3.87	
<b>Additional actions</b>				
	<b>Powers</b>			<b>Comments and advice given or action taken if necessary</b>

Point for consideration	Risk level	Satisfactory?	Requirement	Comments and advice given or action taken if necessary
<p><b>h. FHI sea lice counts</b></p> <p>If necessary conduct a sea lice count in accordance with the protocol of the CoGP. Indicate where this procedure has been done and make a record of results within the comments box</p>	Power granted under the Act		– section 3 (2) (a)	
<p><b>i. Collection of samples</b></p> <p>If necessary collect samples. Indicate if samples have been taken and detail what those samples are and the purpose of their collection</p>	Power granted under the Act		– section 3 (3) (a)	
<p><b>j. Enforcement Notice.</b></p> <p>If an enforcement notice has been issued then maintain a copy / duplicate and record detail</p> <p>Guidance on completing the Enforcement Notice</p>	Power granted under the Act		– Section 6 (2)	

- [1] Scottish Statutory Instrument – The Fish Farming Businesses (Record Keeping) (Scotland) Order 2008
- [2] A Code of Good Practice for Scottish Finfish Aquaculture
- [3] Water temperature to be measured at the half way point of the depth of the facility containing the fish, or as close to as possible. For SW cage sites one reading per count may be s
- [4] Recording requirements:- for *C. elongatus* – all identifiable stages and for *L. salmonis* - mobiles and adult females (with or without egg strings)
- [5] Area refers to management area as specified within Part 3 of the industry CoGP or as redefined appropriately
- [6] For reference Annex 6 of the CoGP provides the detail of the NTS
- [7] FMA = Farm Management Area
- [8] FMS = Farm Management Statement
- [9] FMAg = Farm Management Agreement
- [10] No further action may be required when answering no to this point and yes to 3.18
- [11] Legal recording requirements within the SSI stipulate – for *Caligus elongatus*: mobiles; and for *Lepeophtheirus salmonis*: non-gravid mobiles and gravid females.

# FISH HEALTH INSPECTORATE VISIT REPORT

## SUMMARY FOR INFORMATION OF SITE OPERATOR

<b>BUSINESS No</b>	FB0134	<b>DATE OF VISIT</b>	22/05/2024
<b>SITE No</b>	FS1290	<b>SITE NAME</b>	Shuna SW (Rubh'an Trilleachain)
<b>CASE No</b>	20240139	<b>INSPECTOR</b>	██████████

### ENHANCED SEA LICE INSPECTION

An enhanced sea lice inspection to ascertain the levels of sea lice and for assessing the measures in place for the prevention, control and reduction of sea lice was conducted in accordance with the Aquaculture and Fisheries (Scotland) Act 2007.

The visit consisted of an inspection of records with regards to sea lice, the stock on site, site procedures with regards to sea lice and the provision of advice.

#### **a) Inspection of sea lice records**

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

#### **b) Inspection of records relating to treatment and control of sea lice**

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

#### **c) Inspection of records relating to farm management groups and area management agreements.**

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

#### **d) Inspection of records relating to training and procedures**

The site meets the requirement of current Scottish industry best practice. There were no recommendations made and no further action is required.

#### **e) Inspection of site and site stock**

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

#### **f) Inspection of farm count procedures**

An inspection of site staff conducting and recording a sea lice count was carried out. This met the requirements of The Fish Farming Business (Record Keeping) (Scotland) Order 2008 and CoGP. No further recommendations or further action required.

R10

**g) Inspection of treatment administration procedures**

No treatments were being administered at the time of inspection therefore, an appropriate assessment could not be made on administration procedures.

**Further Action**

The site meets the requirement of current Scottish industry best practice. No further recommendations are made, or further action required.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

# FISH HEALTH INSPECTORATE VISIT REPORT

## SUMMARY FOR INFORMATION OF SITE OPERATOR

<b>BUSINESS No</b>	FB0134	<b>DATE OF VISIT</b>	22/05/2024
<b>SITE No</b>	FS1290	<b>SITE NAME</b>	Shuna SW (Rubh'an Trilleachain)
<b>CASE No</b>	20240139	<b>INSPECTOR</b>	██████████

### Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

#### Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Directorate were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

### Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

R25

## Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

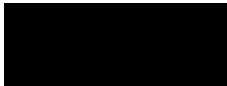

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice), section 4A regarding fish farm management agreements and statements and section 5 regarding containment and escapes.

On this occasion the site was found to be satisfactory with regards to fish farm management agreements and statements and containment and escapes.

An enhanced sea lice inspection was conducted. A separate report will be issued in due course.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
