Additional Case Information:

Site will be stocked November 2024 to April 2025.

Mortality usually between 2-50 per week per tray. Usually on the lower end of that except when failed hatches occur, resulting in 50-200 mortalities per tray per week. Mortality checked daily and mortality removed but main pickings are done once or twice a week. Only one mortality above threshold last cycle - wk 20 2024 (4.03% for 1st feeding to 5g) due to runts.

Eggs for input onto site are imported from Iceland and most recent health certificates (2023 input) were seen while on site.

Hatchery consists of 3 tray units with a total of 48 individual trays and 9 indoor tanks.

All paperwork inspected on the day of inspection.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

Business No FB0061 Date of Visit 08/10/2024

SITE NO FS1061 SITE NAME Inverkerry Hatchery
CASE NO 20240383 INSPECTOR

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009.

On this occasion, the site was found to be fallow.

Records

The surveillance frequency category of the site was assessed as high. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted annually. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007 with respect to section 5 regarding containment and escapes.

On this occasion the site was found to be fallow and the measures in place for the containment of stock could not be assessed.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Date: 10/10/2024

The Fish Health Inspectorate Service Charter detailing standards of service is available on the Scottish Government website at Fish Health Inspectorate Service Charter - gov.scot (www.gov.scot)
